Reflective Enquiry Into Therapeutic Institutions:

Reflective Enquiry into Therapeutic Institutions Lesley Day, Pam Pringle, 2018-03-26 Therapeutic practice needs constant examination to ensure that it remains responsive and dynamic Living organisms must communicate with their environment if they are to survive and institutions are no different This monograph the second of the Cassell Hospital series explores this concept further By reading it ideas and thinking will be sparked off that will help other organisations promote their own culture of enquiry Kevin Healy Director of the Cassell Hospital from his Foreword The contemporary Cassell Hospital was developed by Tom Main to create a self exploratory institution Main argued that in order for the hospital to be therapeutic it needs a culture of enquiry The individual and the institution might be seduced into ritualised working practices that no longer serve the needs of patients or staff It is these lapses from the continual enquiry that are considered by this collection It describes the mostly unconscious manoeuvres that inhibit reflection and how the inappropriate use of psychoanalytic ideas can close off enquiry within a therapeutic community

Suffering Insanity R. D. Hinshelwood,2004 When madness is intolerable for sufferers how do professional carers remain sane Psychiatric institutions

have always been places of fear and awe Madness impacts on family friends and relatives but also those who provide a caring environment whether in large institutions of the past or community care in the present This book explores the effects of the psychotic patient s suffering on carers and the culture of psychiatric services Suffering Insanity is arranged as three essays The first concerns staff stress in psychiatric services exploring how the impact of madness demands a personal resilience as well as careful professional support which may not be forthcoming The second essay attempts a systematic review of the nature of psychosis and the intolerable psychotic experience which the patient attempts to evade and which the carer must confront in the course of daily work The third essay returns to the impact of psychosis on the psychiatric services which frequently configure in ways which can have serious and harmful effects on the provision of care In particular service may succumb to an unfortunate schismatic process resulting in sterile conflict and to an assertively scientific culture which leads to an unwitting depersonalisation of patients Suffering Insanity makes a powerful argument for considering care in the psychiatric services as a whole system that includes staff as well as patients all need attention and understanding in order to deliver care in as humane a way as possible All those working in the psychiatric services both in large and small agencies and institutions will appreciate that closer examination of the actual psychology and interrelations of staff as well as patients is essential and urgent
