

Deloitte on Africa The Rise and Rise of the African Middle Class

Africa's middle class has tripled over the last 30 years, with one in three people now considered to be living above the poverty line - but not among the wealthy. The current trajectory suggests that the African middle class will grow to 1.1 billion (42%) in 2060. As African economies are growing (7 of the 10 fastest growing in the world are African), the wealth is trickling down and Africa now has the fastest growing middle class in the world.

The rise of the middle class, as a percentage of the population, has been steady - in 1980, 111 million or 26% of the continent's population fell in this category rising to 151.4 million or 27% of the population in 1990 with a further surge to 196 million in 2000 and a dramatic increase to 313 million in 2010 equating to 34.3% of the population (African Development Bank, 2011). In contrast, the rise in absolute numbers, compared to the percentage rise, has been more dramatic and this is best explained by the increase in population with Africa having hit the 1 billion population mark in 2010.

This population boom captures, at once, the African opportunity and her dilemma. The opportunity is that large population numbers create the very necessary volume for any consumer goods and services. Numbers move product. The dilemma is that Africa's population growth has undercut any dramatic reduction in poverty. For now though, we will focus only on the opportunity on the premise that profit is underpinned by volume.

It is vital, at this early juncture, to define the term middle class. The African Development Bank (AfDB) defines the African middle class as those spending between US\$2 and US\$20 a day. While, in the developed world, this may appear too low to be classified as middle class spending, the Bank deems this range appropriate given the cost of living on the world's poorest continent. Middle class is defined in relation to the average income and that average is lower in Africa than in the west. They take a PPP perspective - not Private Public Partnership - rather, Purchasing Power Parity perspective. Simply put, US\$20 has more stretch in Berlin, for instance, than in the USA.

Within this broad African middle class category, there are further sub-classes: upper middle class equates to those spending between US\$10 and US\$20 a day. Lower middle refers to those spending US\$4 and US\$10 a day and the floating class are those that are the most vulnerable in society spending between US\$2 and US\$4 - this only slight above the developing world poverty line of US\$2 person per day. At 313 million, the African middle class is roughly the same size as its Indian and Chinese counterparts and this is the very basis of media reports such as "Africa is the new Asia" - Newsweek cover in 2010 and the "The Hopeful Continent: Africa Rising" with the subtext: "After decades of slow growth, Africa has a real chance to follow in the footsteps of Asia (The Economist, 2011).

Rise Of An African Middle Class:

The Rise of an African Middle Class Michael O. West, 2002-08-19 An in depth look at Africans who challenged the status quo in colonial Zimbabwe Impeccable and original scholarship American Historical Review Tracing their quest for social recognition from the time of Cecil Rhodes to Rhodesia's unilateral declaration of independence Michael O West shows how some Africans were able to avail themselves of scarce educational and social opportunities in order to achieve some degree of upward mobility in a society that was hostile to their ambitions Though relatively few in number and not rich by colonial standards this comparatively better off class of Africans challenged individual and social barriers imposed by colonialism to become the locus of protest against European domination This extensive and original book opens new perspective into relations between colonizers and colonized in colonial Zimbabwe Offers an extremely sophisticated nuanced view of the social and political construction of an African middle class in colonial Zimbabwe Elizabeth Schmidt *The Rise of Africa's Middle Class* Henning Melber, 2016-12-15 Across Africa a burgeoning middle class has become the poster child for the Africa rising narrative Ambitious aspirational and increasingly affluent this group is said to embody the values and hopes of the new Africa with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change This narrative however obscures the complex and often ambiguous role that this group actually plays in African societies Bringing together economists political scientists anthropologists and development experts and spanning a variety of case studies from across the continent this collection provides a much needed corrective to the received wisdom within development circles and provides a fresh perspective on social transformations in contemporary Africa **The Rise of Africa's Middle Class** Henning Melber, 2016-12-15 Across Africa a burgeoning middle class has become the poster child for the Africa rising narrative Ambitious aspirational and increasingly affluent this group is said to embody the values and hopes of the new Africa with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change This narrative however obscures the complex and often ambiguous role that this group actually plays in African societies Bringing together economists political scientists anthropologists and development experts and spanning a variety of case studies from across the continent this collection provides a much needed corrective to the received wisdom within development circles and provides a fresh perspective on social transformations in contemporary Africa Middle Classes in Africa Lena Kroeker, David O'Kane, Tabea Scharrer, 2018-02-19 This volume challenges the concept of the new African middle class with new theoretical and empirical insights into the changing lives in Sub Saharan Africa Diverse middle classes are on the rise but models of class based on experiences from other regions of the world cannot be easily transferred to the African continent Empirical contributions drawn from a diverse range of contexts address both African histories of class formation and the political roles of the

continent's middle classes and also examine the important interdependencies that cut across inter-generational urban-rural and class divides. This thought-provoking book argues emphatically for a revision of common notions of the middle class and for the inclusion of insights from the South into the global debate on class. *Middle Classes in Africa* will be of interest to students and scholars across a range of disciplines as well as NGOs and policy makers with an interest in African societies.

The New Black Middle Class in South Africa Roger Southall, 2016. Provides the most comprehensive account since the early 1960s of South Africa's black middle class. 2016 CHOICE Outstanding Academic Title. The rise of the black middle class is one of the most visible aspects of post-apartheid society in South Africa. Yet while it has been a major actor in the country's democratic reshaping, analysis of its role has been all but lacking. Rather, the image presented by the media has been of black diamonds, consumers of the products of advanced industrial economies and of corrupt tenderpreneurs who use their political connections to obtain contracts. This book seeks to complicate that picture with a much-needed analysis that recounts its historical development in colonial society prior to 1994, before examining the size, shape and structure of the new black middle class in contemporary South Africa and its relation to its counterparts in the Global South. Roger Southall is Professor Emeritus in Sociology, University of the Witwatersrand, Southern Africa. South Africa, Namibia, Botswana, Lesotho, Zimbabwe and Swaziland. Jacana.

The Middle Class in World Society Christian Suter, S. Madheswaran, B.P.

Vani, 2020-05-21. This volume delves into the study of the world's emerging middle class. With essays on Europe, the United States, Africa, Latin America and Asia, the book studies recent trends and developments in middle class evolution at the global, regional, national and local levels. It reconsiders the conceptualization of the middle class with a focus on the diversity of middle class formation in different regions and zones of world society. It also explores middle class lifestyles and everyday experiences, including experiences of social mobility, feelings of insecurity and anxiety, and even middle class engagement with social activism. Drawing on extensive fieldwork and in-depth interviews, the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates. It will be of importance to students and researchers of sociology, economics, development studies, political studies, Latin American studies and Asian Studies.

The Emerging Middle Class in Africa Mthuli Ncube, Charles Lufumpa, 2014-10-10. The emergence of the African middle class as a driver of Africa's economic growth stands out as an important milestone in Africa's contemporary economic history. This growth, though uneven, is a source of hope for Africa but also a signal to the rest of the world on the prospects for economic recovery and renewal, particularly because it has been steady despite the global downturn. *The Emerging Middle Class in Africa* analyses specific aspects of the lives of the middle class in Africa. It looks at how people become and remain in the middle class through a series of thematic chapters. It examines how behaviour changes in the process in terms of consumption patterns and spending on health and education. A further dimension of this analysis is how class impacts on gender relations and whether women are able to reap the same benefits of social advancement.
