Risk Management of Non-Renewable Energy Systems Ajit Kumar Verma, Srividya Ajit, Hari Prasad Muruva, 2015-05-09

This book describes the basic concepts of risk and reliability with detailed descriptions of the different levels of probabilistic safety assessment of nuclear power plants both internal and external. The book also maximizes readers' insights into time dependent risk analysis through several case studies whilst risk management with respect to non renewable energy sources is also explained. With several advanced reactors utilizing the concept of passive systems the reliability estimation of these systems are explained in detail with the book providing a reliability estimation of components through mechanistic model approach. This book is useful for advanced undergraduate and post graduate students in nuclear engineering aerospace engineering industrial engineering reliability and safety engineering systems engineering and applied probability and statistics. This book is also suitable for one semester graduate courses on risk management of non renewable energy systems in all conventional engineering branches like civil mechanical chemical electrical and electronics as well as computer science. It will also be a valuable reference for practicing engineers managers and researchers involved in reliability and safety activities of complex engineering systems.

Disaster Management and Human Health Risk II C. A. Brebbia, Alain J.

Kassab, E. Divo, 2011. The increase in the number of large scale natural disasters in recent years has been alarming. Major floods hurricanes earthquakes and many others have affected millions of people with great destruction of property and loss of life while forest fires pipeline failures and bombings have had equally devastating effects over a smaller scale. It is clear that future threats stem both from human failures and from terrorism as well as from less predictable natural phenomena. The increased threats make the convening of the Second International Conference on Disaster Management and Human Health Risk important for the sharing of knowledge among experts on public health security and disaster management. This book contains their contributions to the conference. Topics covered will include Emergency preparedness Risk mitigation Natural disasters Man made disasters Learning from disasters Disaster analysis monitoring and mitigation Global risks and health Pandemic and biological threats Surveillance and early warning systems Public health preparedness Socio economic issues and Service sustainability.
