

Decision Making, Risk & Uncertainty

Risk Uncertainty And Decision Making

Craig Roger Fox

Risk Uncertainty And Decision Making:

Risk, Uncertainty and Decision-Making in Property P. Byrne,2002-11-01 Provides undergraduates in surveying and property professionals with a clear practical explanation of the various management techniques to improve their property development decisions

Risk, Uncertainty & Decision-making Juliane Marold,2015 *Risk, Uncertainty & Decision-making* Fondation pour une culture de sécurité industrielle,2012 *Advances in Decision Making Under Risk and Uncertainty* Mohammed Abdellaoui,John D. Hey,2008-09-17 Whether we like it or not we all feel that the world is uncertain From choosing a new technology to selecting a job we rarely know in advance what outcome will result from our decisions Unfortunately the standard theory of choice under uncertainty developed in the early forties and fifties turns out to be too rigid to take many tricky issues of choice under uncertainty into account The good news is that we have now moved away from the early descriptively inadequate modeling of behavior This book brings the reader into contact with the accomplished progress in individual decision making through the most recent contributions to uncertainty modeling and behavioral decision making It also introduces the reader into the many subtle issues to be resolved for rational choice under uncertainty

The Art of Making Decisions Under Uncertainty Charles Yoe,2025-09-04 Uncertainty is a part of every decision we make from the everyday to the high stakes from personal choices to professional strategy The Art of Making Decisions Under Uncertainty offers a clear practical approach to dealing with the unknown without getting stuck or overwhelmed Rather than treating uncertainty as a barrier this book invites readers to see it as a constant companion something to work with not work against Drawing on proven tools real world examples and a wealth of practical insight it shows how to make thoughtful informed decisions even when information is incomplete priorities are competing and the path forward feels anything but clear This is not a theory heavy treatise It s a textbook guide for real people facing real decisions Grounded in decision science but written for a broad audience it bridges the gap between technical complexity and everyday practicality Whether you re leading a team managing risk shaping policy or simply trying to make better personal choices this book meets you where you are with tools that work language that makes sense and encouragement to move forward with clarity and confidence Inside you ll find Straightforward frameworks to help you recognize and manage different types of uncertainty Practical tools and techniques you can use right away to make sound decisions in fast moving or high pressure situations Case studies and examples that bring the concepts to life and show how they apply in work leadership and daily life Fresh perspectives on failure bias and risk helping you not only avoid common pitfalls but turn setbacks into sources of insight If you ve ever hesitated at a crossroads second guessed a big decision or wished for more clarity in a world that rarely offers it this book is for you The Art of Making Decisions Under Uncertainty is your companion in making better choices when certainty is out of reach but a good decision is still within your grasp

Risk, Uncertainty and Policy Patrick Brown,Anna Olofsson,2017-10-02 Policy making has always involved uncertainty however the presence of unknowns has become far more

conspicuous and problematic in recent times One important way in which policy makers have increasingly sought to deal with such uncertainty is through approaches rooted in understandings of risk This book comprises a rather diverse collection of six chapters alongside one more explicitly theoretical introduction each taking up a distinct perspective in scrutinising the relationship between policy risk and uncertainty Important concerns addressed within these different studies include how risk governance policies are shaped by risk awareness or a lack thereof and the mediating role of trust the framing of policy through an emphasis on particular risks and the corresponding impact on societal beliefs discourses and institutional power the organisational processes which lead to some risks being tackled while others are neglected and processes of de politicising uncertainty at the interface between scientists and policy makers Contributors explore trans national institutions national bodies and local government within diverse geographical contexts including China Brazil the Baltic Sea Australia the UK and Europe This book was originally published as a special issue of the Journal of Risk Research

Risk, Uncertainty, and Decision-making in Property Development Peter Byrne, David Cadman, 1984

Risk and Presidential Decision-making Luca Trenta, 2016-05-20 This book aims at gauging whether the nature of US foreign policy decision making has changed after the Cold War as radically as a large body of literature seems to suggest and develops a new framework to interpret presidential decision making in foreign policy It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography international relations and Presidential studies Based on developments in the health and environment literature the book identifies the President as the ultimate risk manager demonstrating how a President is called to perform a delicate balancing act between risks on the domestic political side and risks on the strategic international side Every decision represents a risk vs risk trade off in which the management of one target risk leads to the development countervailing risks The book applies this framework to the study three major crises in US foreign policy the Cuban Missile Crisis the seizure of the US Embassy in Tehran in 1979 and the massacre at Srebrenica in 1995 Each case study results from substantial archival research and over twenty interviews with policymakers and academics including former President Jimmy Carter and former Senator Bob Dole This book is ideal for postgraduate researchers and academics in US foreign policy foreign policy decision making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences The case studies will also be of great use to undergraduate students

Uncertainty in Risk Assessment, Risk Management, and Decision Making V.T. Covello, Lester B. Lave, Alan Moghissi, V.R.R. Uppuluri, 2013-03-08 The subject of this volume uncertainties in risk assessment and management reflects an important theme in health safety and environmental decision making Most technological hazards are characterized by substantial uncertainty Recent examples include nuclear waste disposal acid rain asbestos in schools carcinogens in food and hazardous waste dealing with such uncertainty is arguably the most difficult and challenging task facing risk assessors and managers today Four primary sources of uncertainty in risk assessment and management can be

identified 1 uncertainties about definitions 2 uncertainties about scientific facts 3 uncertainties about risk perceptions and attitudes and 4 uncertainties about values Uncertainties about definitions derive primarily from disagreements about the meaning and interpretation of key concepts such as probability Uncertainties about scientific facts derive primarily from disagreements about failure modes the probability and magnitude of adverse health or environmental consequences cause and effect relationships dose response relationships and exposure patterns Uncertainties about risk perceptions and attitudes derive primarily from disagreements about what constitutes a significant or acceptable level of risk Uncertainties about values derive primarily from disagreements about the desirability or worth of alternative risk management actions or consequences The papers in this volume address each of these sources of uncertainty from a variety of perspectives Reflecting the broad scope of risk assessment and risk management research the papers include contributions from safety engineers epidemiologists toxicologists chemists biostatisticians biologists decision analysts economists psychologists political scientists sociologists ethicists and lawyers

Risk, Uncertainty, and Ignorance in Decision Making Craig Roger Fox, 1994
