

Risk – Benefit Analysis Form for Interrupting/Pausing Face-to-Face Services During COVID-19

As we provide in-home health care using Applied Behavior Analysis Services, (although the Denver area does not currently have a “shelter-in-place order”) in concordance with the “shelter-in-place orders” in other U.S. cities, we are taking actions that will follow the guidelines and restrictions proposed in those cities for purposes of public health and safety measures, while continuing to provide the necessary level of care and support to our clients that is commensurate with the individual and unique needs of each of our clients. Current “shelter-in-place” orders include the following guidelines and restrictions that specifically relate to our services:

Essential Businesses stay open

- Home-based care for seniors, adults and children
- Healthcare operations

Essential Activities are allowed

- To do things essential to the health and safety of the household, including pets, like getting medical supplies, visiting a clinic or hospital, or obtaining supplies to work from home.
- To continue working for a healthcare operation, like a hospital, clinic, dentist's office, pharmacy, pharmaceutical and biotech company, a healthcare facility, healthcare supplier, home healthcare service, mental health provider, veterinary office or other related services.

Current CDC Guideline Checklist:

Client Name: _____ **Client Supervisor :** _____

Check “yes,” if you agree that the following can and will occur while continuing to provide in-home ABA services. All **required** items must be checked “yes,” in order for ABA services to be able occur in-home.

Required: ☐ YES ☐ NO	Less than 10 people gathering in one place in home location only (could be difficult with larger families and multiple providers present).
Required: ☐ YES ☐ NO	☐ Social distancing: maintaining at least 6 feet between individuals without provider(s) wearing surgical mask. (See: Open Door & Greeting Protocol*) OR ☐ While working with client, if close contact is necessary (within 6 feet) and could include instances where there is direct contact with infectious secretions (respiratory droplets), provider(s) must wear disposable surgical mask or reusable clear face shield/mask at all times in protection of the client, as “The Centers for Disease Control and Prevention (CDC) identify an increased risk of COVID-19 infection -- and more acute conditions if infected -- for individuals with intellectual disabilities and developmental delays regardless of age.”
Optional: ☐ YES ☐ NO	For their own protection, provider(s) may also choose to wear PPE (e.g. respirator mask) under their surgical mask or under their clear face mask.

Riskbenefit Analysis

Edmund A. C. Crouch, Richard Wilson

Riskbenefit Analysis:

Risk/benefit Analysis Edmund A. C. Crouch, Richard Wilson, 1982 Over the centuries mankind has slowly reduced the risks and hazards that even as recently as a century ago kept life expectancy to a mere 45 years Our average lifespan has improved to 77 years by remarkable progress in public health and safety But with this improvement has come a demand for greater efforts to improve both life expectancy and the quality of life The first edition of this book published in 1982 was a pioneer in the development of logical yet simple analytic tools for discussion of the risks which we all face This new edition revised expanded and illustrated in detail should be of value both to professionals in the field and to those who wish to understand these vital issues

Risk-benefit Analysis in Decisions Concerning Public Safety and Health Mark Sagoff, 1985 **Risk/benefit Analysis in the Legislative Process**, 1980 *Risk/Benefit Analysis in Water Resources Planning and Management* Yacov Haimes, 2013-06-29 Ronald M North President Universities Council on Water Resources People sense intuitively that the world in which we live is not free of risk Every decision every action even the refusal to either act or decide involves some element of risk Perhaps because we accept relatively low levels of risk in our daily activities we tend to minimize the existence of risk and thereby fail to include risk assessment in those decisions and actions which could be improved through a risk assessment process However our casual approach to risk assessment seems to stem largely from the difficulties inherent in measuring risk rather than from any lack of cognizance of the existence of risk This conclusion is evidenced by the many statements in official documents relating to planning and evaluation which suggest that risk assessments should be conducted but do not provide the mechanism for such assessments nor do they encourage their consideration in the decision making process This conference on Risk Benefit Analysis in Water Resources Planning and Management is notable because it attempts to identify and evaluate the mechanisms available for risk assessment which might be useful in water resources planning and management efforts These proceedings bring together the thoughts of professional persons who have struggled with the problems of risk assessment and who have contributed to the refinement of both theoretical and pragmatic solutions for the improvement of risk assessment processes

Risk-Benefit Analysis in Drug Research J.F. Cavalla, 2012-12-06 The appreciation of risk like the awareness of beauty lies very much in the eyes of the beholder It involves a value judgement and can never be absolute Yet paradoxically modern society is demanding ever greater degrees of safety in the medicines it takes to the extent that nothing short of the total absence of risk will be tolerated Since 1960 and mainly as a result of the thalidomide tragedy governmental regulation of testing and use of new medicines has grown apace throughout the world It has derived impetus not only from the understandable wish of the public to seek protection but also from the anxiety of bureaucrats and politicians not to be seen to have made mistakes Both these concerns have been inflamed by the recognition of the media that all drugs make news and horror drugs make the best news of all Prior to this time the physician and his cures enjoyed a relatively supportive public It was true that quacks existed and

were recognized as such but in the main people wanted to take medicines and expected them to do them good

Risk-benefit Analysis and Public Policy, 1976 Risk benefit analysis has been implicitly practiced whenever decision makers are confronted with decisions involving risks to life health or to the environment Various methodologies have been developed to evaluate relevant criteria and to aid in assessing the impacts of alternative projects Among these have been cost benefit analysis which has been widely used for project evaluation However in many cases it has been difficult to assign dollar costs to those criteria involving risks and benefits which are not now assigned explicit monetary values in our economic system Hence risk benefit

analysis has evolved to become more than merely an extension of cost benefit analysis and many methods have been applied to examine the trade offs between risks and benefits In addition new scientific and statistical techniques have been developed for assessing current and future risks The 950 references included in this bibliography are meant to suggest the breadth of those methodologies which have been applied to decisions involving risk

Risk/benefit Decisions and the Public Health Jeffrey A. Staffa,1980

Benefit-Risk Assessment of Medicines James Leong,Sam Salek,Stuart Walker,2015-04-21 This book proposes and investigates a universal framework and accompanying documentation system to facilitate and catalogue benefit risk decisions a valuable addition to the benefit risk toolbox Over the past decade pharmaceutical companies and regulatory agencies have been reviewing the benefit risk assessment of medicines with a view to developing a structured systematic standardized approach Examining the evaluation of such an approach by several mature regulatory authorities ensures that the reader gains a unique insight into the ongoing debate in this area The field of benefit risk assessment continues to evolve at a rapid pace due to political and societal pressure as is reflected in the recent FDA PUDFA agreement as well as in the EMA 2015 Roadmap Rather than provide a comprehensive snap shot of this constantly changing environment this book evaluates selected current approaches to benefit risk assessment The strengths and weaknesses of publicly available documents in communicating benefit risk decisions to stakeholders are reviewed and these evaluations are used to inform development of a prospective framework that could be used to harmonise procedures globally
