Chinese Street Music Samuel Horlor, 2021-04-29 Musical community is a notion commonly evoked in situations of intensive collective activity and fervent negotiation of identities Passion Square shows the daily singing of Chinese pop classics in parks and on street corners in the city of Wuhan have an ambivalent relationship with these ideas They inspire modest outward signs of engagement and are guided by apparently individualistic concerns singers are primarily motivated by making a living through the relationships they build with patrons and reflection on group belonging is of lesser concern How do these orientations help complicate the foundations of typical musical community discourses This Element addresses community as a quality rather than as an entity to which people belong exploring its ebbs and flows as associations between people other bodies and the wider street music environment intersect with its various theoretical implications A de idealised picture of musical community better acknowledges the complexities of everyday musical experiences

Evasdottir,2007-10-01 In the west the idea of autonomy is often associated with a sense of freedom a self interested state of being unfettered by rules or obligations to others This original anthropological study explores a type of obedient autonomy that thrives on setbacks blossoms as more rules are imposed and flourishes in adversity Obedient Autonomy analyzes this model and explains its precepts through examining the specialized and highly organized discipline of archaeology in China The book follows Chinese students on their journey to becoming full fledged archaeologists in a bureaucracy saturated environment Often required to travel in teams to the countryside archaeologists are uniquely obliged to overcome divisions among themselves between themselves and their peasant workers and between themselves and bureaucratic officials This analysis reveals how these interactions provide teachers of archaeology with stories used to foster obedient autonomy in their students Moreover it demonstrates how this form of autonomy enables a person to order and control their future careers in what appears to be a disorderly and uncertain world A masterly contextualization of archaeology in China Obedient Autonomy shows how the discipline has accommodated itself to a Chinese social structure and uncovers the moral ethical political and economic underpinnings of that context It will be accessible to students of anthropology even as it will provoke Euro American archaeologists and interest social theorists of science philosophers gender theorists and students of Chinese society Women and Gender in Contemporary Chinese Societies Shanshan Du,Ya-chen Chen,2013-03-04 Recent attention to historical geographic and class differences in the

studies of women and gender in China has expanded our understanding of the diversity and complexity of gendered China. Nevertheless, the ethnic dimension of this subject matter remains largely overlooked, particularly concerning women's conditions and gender status. Consequently, the patriarchy and its oppression of women among the Han, the ethnic majority in China, are often inaccurately or erroneously associated with the whole gendered heritage of China epitomized by the infamous traditions of footbinding and female infanticide. Such academic and popular predisposition belies the fact that gender systems in China span a wide spectrum ranging from extreme Han patriarchy to Lahu gender egalitarianism. The authors contributing to this book have collectively initiated a systematic effort to bridge the gap between understanding the majority Han and ethnic minorities in regard to women and gender in contemporary Chinese societies. By achieving a quantitative balance between articles on the Han majority and those on ethnic minorities, this book transcends the ghettoization of ethnic minorities in the studies of Chinese women and gender. The eleven chapters of this volume are divided into three sections which jointly challenge the traditions and norms of Han patriarchy from various perspectives. The first section focuses on gender traditions among ethnic minorities which compete with the norms of Han patriarchy. The second section emphasizes the impact of radical social transformation on gender systems and practices among both Han and ethnic minorities. The third section underscores socio-cultural diversity and complexity in resistance to Han patriarchal norms from a broad perspective. This book complements previous scholarship on Chinese women and gender by expanding our investigative lens beyond Han patriarchy and providing images of the multiethnic landscape of China. By identifying the Han as an ethnically marked category and by bringing to the forefront the diverse gender systems of ethnic minorities, this book encourages an increasing awareness of and sensitivity to the cross-cultural diversity of gendered China both in academia and beyond.

New Directions in Anthropological Kinship Linda Stone, 2002-05-30

Following periods of intense debate and eventual demise, kinship studies is now seeing a revival in anthropology. *New Directions in Anthropological Kinship* captures these recent trends and explores new avenues of inquiry in this re-emerging subfield. The book comprises contributions from primatology, evolutionary anthropology, archaeology, and cultural anthropology. The authors review the history of kinship in anthropology and its theory and recent research in relation to new directions of anthropological study. Moving beyond the contentious debates of the past, the book covers feminist anthropology on kinship, the expansion of kinship into the areas of new reproductive technologies, recent kinship constructions in Euro-American societies, and the role of kinship in state politics.
