Loving Nature Ecological Integrity And Christian Responsibility:

Loving Nature James A. Nash,1991 The ecological crisis is a serious challenge to Christian theology and ethics because the crisis is rooted partly in flawed convictions about the rights and powers of humankind in relation to the rest of the natural world James A Nash argues that Christianity can draw on a rich theological and ethical tradition with which to confront this challenge *Christianity and Ecological Theology* E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa *A Reenchanted World* James William Gibson,2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature s magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in **Love, Technology and Theology** Scott A. Midson,2020-06-25 This volume explores love in the context of today s technologies It is difficult to separate love from romanticist ideals of authenticity intimacy and depth of relationship These ideals resonate with theological models of love that highlight the way God benevolently created the world and continues to love it Technologies which are designed in response to our desires do not necessarily enjoy this romanticist resonance and yet they are now remodelling the world Are technologies then antithetical to love In this volume leading theologians have brought together themes of theology technology and love for the first time exploring different areas where notions of love and technology are problematized In a world where algorithms and artificial intelligences interact with us and shape our lives in ever more intricate and even intimate ways we might feel attachments to and through machines that suggest sentiments of love while also changing how we think about love Does love always have to be reciprocal How can we enact love and care for others with technologies Whose desires do technologies serve consumers corporations creatures This volume offers a systematic review of the challenges of living in a technologically saturated world by means of critical application of as well as reflection on theological

discussions about love **Celebrating Nature by Faith** H. Paul Santmire, 2020-09-09 Sometimes it is helpful to take one step backward in order to take two steps forward In this insightful volume H Paul Santmire draws on his long standing and widely recognized engagement with ecological theology to propose that the traditions of the Protestant Reformation rightly read offer rich resources today for those who are struggling to move forward to respond theologically to the crisis of a planet in peril and thereby to celebrate nature by faith **Encyclopedia of Religion and Nature** Bron Taylor, Jeffrey Kaplan, 2005-01-01 No Marketing Blurb **Theology of Work** Gregorio Guitián, 2024-11-25 Theology of Work New Perspectives emerges from the necessity to continue theological reflection on work in light of the challenges posed by our contemporary world The contributions offer a global perspective of the meaning of work drawing from Trinitarian theology theology of creation eschatology theological anthropology and Christology They shed light from the perspective of faith on the integration of different work dimensions and consider how the theology of work is called to challenge social structures in light of revelation The volume mostly develops the theology of work from a Catholic perspective but Protestant and Orthodox approaches are also explicitly explored The chapters cover different theological areas such as biblical dogmatic patristic and moral theology to provide enriching and complementary perspectives Offering fresh and valuable theological insights on work this book will be of particular interest to scholars of theology and religious studies *A Church Wide Enough for Everyone* Steven H. Propp, 2018-02-03 Robert Schaeffer and Douglas West are best friends living in Oklahoma in 1963 when they discover that they both sense a calling to become ministers in a mainline Christian denomination But from seminary and their early years in ministry to their golden years looking back on what it takes to lead a congregation a stimulating sometimes puzzling yet often inspirational world of theological controversies and congregational concerns would unfold for these two men of God *A Church Wide Enough for Everyone* follows these two men on their journey to demonstrate the continuing relevance of the Christian faith in a postmodern world After moving to Berkeley California to attend college and seminary they have little time to ponder the vast social changes taking place before they immediately enter into intensive critical study of the Bible and Christian theology And as Robert is then thrust into the ordained ministry with his wife Faye both men must in their own ways face the political cultural and ideological pressures of each passing decade responding to challenges from both within the church and from outsiders Are mainline churches and Christian theology dead Or might they be revitalized in the current century *A Church Wide Enough for Everyone* and the inspired journeys of two ministers offers a window into how this revitalization and new understanding is possible **Doctrine in Shades of Green** Andrew J. Spencer, 2022-01-13 How we come to our conclusions about ethical issues matters as much as the specific policies or practices we commend This book argues that four key doctrines form a theological perspective for environmental ethics They are the key ideas upon which people build their ethics of the environment By looking at the doctrines of revelation creation anthropology and eschatology we can find points of contact to work together more effectively for the common good and have

more meaningful debates when our positions differ This book uses examples from four different theological positions ecotheology theological liberalism fundamentalism and evangelicalism to show that a creation positive ethic is possible from all of these positions and it explores why people who stand within various theological streams may engage in environmental issues in diverse ways

Ecologies of Grace Willis Jenkins, 2008-02-04 Christianity struggles to show how living on Earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In *Ecologies of Grace* Willis Jenkins presents a field shaping introduction to Christian environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal

Plants as Persons Matthew Hall, 2011-05-06 Plants are people too No but in this work of philosophical botany Matthew Hall challenges readers to reconsider the moral standing of plants arguing that they are other than human persons Plants constitute the bulk of our visible biomass underpin all natural ecosystems and make life on Earth possible Yet plants are considered passive and insensitive beings rightly placed outside moral consideration As the human assault on nature continues more ethical behavior toward plants is needed Hall surveys Western Eastern Pagan and Indigenous thought as well as modern science for attitudes toward plants noting the particular resources for plant personhood and those modes of thought which most exclude plants The most hierarchical systems typically put plants at the bottom but Hall finds much to support a more positive view of plants Indeed some indigenous animisms actually recognize plants as relational intelligent beings who are the appropriate recipients of care and respect New scientific findings encourage this perspective revealing that plants possess many of the capacities of sentience and mentality traditionally denied them

The Cosmic Common Good Daniel P. Scheid, 2015-12-01 As ecological degradation continues to threaten permanent and dramatic changes for life on our planet the question of how we can protect our imperiled Earth has become more pressing than ever before In this book Daniel Scheid draws on Catholic social thought to construct what he calls the cosmic common good a new norm for interreligious ecological ethics This ethical vision sees humans as an intimate part of the greater whole of the cosmos emphasizes the simultaneous instrumental and intrinsic value of nature and affirms the integral connection between religious practice and the pursuit of the common good When ecologically reoriented Catholic social thought can point the way toward several principles of the cosmic common good such as the virtue of Earth solidarity and the promotion of Earth rights These are rooted in the classical doctrines of creation in Augustine and Thomas Aquinas and in Thomas Berry's interpretation of the evolutionary cosmic story The cosmic common good can also be found in Hindu Buddhist and American Indian religious traditions By placing a Catholic cosmic common good in dialogue with Hindu dharmic ecology Buddhist interdependence and American Indian balance with all our relations Scheid constructs a theologically authentic moral framework that re-envision's humanity's role in the universe
