    Real-Time Expert Systems Computer Architecture R.F. Hodson,2018-01-17 Expert systems and real time systems technology have been developed independently Expert systems have been successfully implemented in many complex applications traditionally performed by human experts Real time systems have been successfully applied in areas requiring interaction with dynamic environments control and monitoring applications for example Merging these two technologies will yield intelligent systems capable of interacting with complex dynamic environments an area in which human operators exhibit poor productivity due to cognitive overload   **VLSI Custom Microelectronics** Stanley L. Hurst,1998-11-05 Focuses on the design and production of integrated circuits specifically designed for a particular application from original equipment manufacturers The book outlines silicon and GaAs semiconductor fabrication techniques and circuit configurations compares custom design style discusses computer aided design tools and more   **Database Machines and Knowledge Base Machines** Masaru Kitsuregawa,Hidehiko Tanaka,2012-12-06 This volume contains the papers presented at the Fifth International Workshop on Database Machines The papers cover a wide spectrum of topics on Database Machines and Knowledge Base Machines Reports of major projects ECRC MCC and ICOT are included Topics on DBM cover new database machine architectures based on vector processing and hypercube parallel processing VLSI oriented architecture filter processor sorting machine concurrency control mechanism for DBM main memory database interconnection network for DBM and performance evaluation In this workshop much more attention was given to knowledge base management as compared to the previous four workshops Many papers discuss deductive database processing Architectures for semantic network prolog and production system were also proposed We would like to express our deep thanks to all those who contributed to the success of the workshop We would also like to express our apprecia tion for the valuable suggestions given to us by Prof D K Hsiao Prof D   **LSI Logic Data Book** Texas Instruments Incorporated,

    Introduction to Logic Design Sajjan G. Shiva,2018-10-03 The second edition of this text provides an introduction to the analysis and design of digital circuits at a logic instead of electronics level It covers a range of topics from number system theory to asynchronous logic design A solution manual is available to instructors only Requests must be made on official school stationery   **LogicWorks** Capilano Computing Systems,1994 An integrated schematic diagram and simulation program which allows students to design and test logic circuits Upwardly compatible with Capilano Computing s DesignWorks professional circuit design system   *Morphological Image Processing: Architecture and VLSI design* P.P. Jonker,2012-12-06 Summary Based on the experiences of past designs and the outcome of recent studies in the comparisons of low level image processing architectures a pipelined system for real time low image processing has been designed and realized in CMOS technology To minimize design pitfalls a study was performed to the details of the design solutions that have been found in embodimentsof the three main architectural groups of image processing the Square Processor Arrays the

Linear Processor Arrays and the Pipelines This is reflected in a theoretical model As the design is based on bitplane wise processing of images research was performed on the principles ofCellularLogic Processing of two dimensional images of binary A methodology has been developed that is based on the transformation images using sets of Hit or Miss masks This method appeared to be extendable to higher dimensional images A theoretical model for the generation of break point conditions in high dimensional images has been developed and applied up to dimension three **Distributed Computer Control Systems 1986** K.D. Muller,M.G. Rodd,2014-05-23 This seventh IFAC workshop on distributed control systems DCCS discusses the ideas of real time synchronization and data consistency in industry with emphasis on the Manufacturing Automation Protocol MAP The volume also debates the gulf between the computer scientist s approach to language and the needs of the application programmer In addition to treating relevant topics each session has an introductory paper and a panel discussion to give a complete picture of the progress and research in this computer field today **Applied Optics Fundamentals and Device Applications** Mark Mentzer,2017-12-19 How does the field of optical engineering impact biotechnology Perhaps for the first time Applied Optics Fundamentals and Device Applications Nano MOEMS and Biotechnology answers that question directly by integrating coverage of the many disciplines and applications involved in optical engineering and then examining their applications in nanobiotechnology Written by a senior U S Army research scientist and pioneer in the field of optical engineering this book addresses the exponential growth in materials applications and cross functional relevance of the many convergent disciplines making optical engineering possible including nanotechnology MEMS MOEMS and biotechnology Integrates Coverage of MOEMS Optics and Nanobiotechnology and Their Market Applications Providing an unprecedented interdisciplinary perspective of optics technology this book describes everything from core principles and fundamental relationships to emerging technologies and practical application of devices and systems including fiber optic sensors integrated and electro optics and specialized military applications The author places special emphasis on Fiber sensor systems Electro optics and acousto optics Optical computing and signal processing Optical device performance Thin film magnetic memory MEMS MOEMS nano and bionanotechnologies Optical diagnostics and imaging Integrated optics Design constraints for materials manufacturing and application space Bridging the technology gaps between interrelated fields this reference is a powerful tool for students engineers and scientists in the electrical chemical mechanical biological aerospace materials and optics fields Its value also extends to applied physicists and professionals interested in the relationships between emerging technologies and cross disciplinary opportunities Author Mark A Mentzer is a pioneer in the field of optical engineering He is a senior research scientist at the U S Army Research Laboratory in Maryland Much of his current work involves extending the fields of optical engineering and solid state physics into the realm of biochemistry and molecular biology as well as structured research in biophotonics *The VHDL Handbook* David R. Coelho,2012-12-06 This book is intended to be a working reference for electronic hardware de signers who are

interested in writing VHDL models A handbook cookbook approach is taken with many complete examples used to illustrate the fea tures of the VHDL language and to provide insight into how particular classes of hardware devices can be modelled in VHDL It is possible to use these models directly or to adapt them to similar problems with minimal effort This book is not intended to be a complete reference manual for the VHDL language It is possible to begin writing VHDL models with little background in VHDL by copying examples from the book and adapting them to particular problems Some exposure to the VHDL language prior to using this book is recommended The reader is assumed to have a solid hardware design background preferably with some simulation experience For the reader who is interested in getting a complete overview of the VHDL language the following publications are recommended reading An Introduction to VHDL Hardware Description and Design LIP89 IEEE Standard VHDL Language Reference Manual IEEE87 Chip Level Behavioral Modelling ARMS88 Multi Level Simulation of VLSI Systems COEL87 Other references of interest are USG88 DOD88 and CLSI87 Use of the Book If the reader is familiar with VHDL the models described in chapters 3 through 7 can be applied directly to design problems
