**Essentials of Assessing Infants, Toddlers, and Pre-Schoolers** Brittany A Dale, Joseph R. Engler, Vincent C. Alfonso, 2025-04-15 A practitioner oriented guide to the most important assessments and

evaluation techniques for children ages 0-5. Many assessment professionals leave their graduate education programs without any formal training in assessing infants and young children. Although there are assessment textbooks covering subsets of this age range, *Essentials of Assessing Infants, Toddlers, and Pre-Schoolers* is uniquely designed for busy practitioners and it covers the full range of assessments for 0-5 years old. With medical advances and new treatments, there is a higher prevalence of children with complex medical and psychological needs. Additionally, changing educational policies often affect assessment practices. Assessment professionals must have current information to effectively assess young children and assist in planning interventions. As with all volumes in the *Essentials of Psychological Assessment* series, this book consists of concise chapters featuring callout boxes highlighting key concepts, easy-to-learn bullet points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Understand the issues unique to assessing children aged 0-5 years. Get expert advice on assessing children with extremely early preterm birth, genetic conditions, and other unique situations. Consider the future directions in the assessment of infants, toddlers, and preschoolers. Quickly and easily locate pertinent information and access resources and tools to aid in performing professional duties. This straightforward manual includes thorough coverage on how assessment results guide effective interventions. *Essentials of Assessing Infants, Toddlers, and Pre-Schoolers* is a valuable addition to the libraries of developmental practitioners, school and clinical psychologists, pediatricians, speech language pathologists, and others responsible for the assessment of very young children.

**Assessing Multilingual Children** Sharon Armon-Lotem, Jan de Jong, Natalia Meir, 2015-04-28. Second language learners often produce language forms resembling those of children with Specific Language Impairment (SLI). At present, professionals working in language assessment and education have only limited diagnostic instruments to distinguish language-impaired migrant children from those who will eventually catch up with their monolingual peers. This book presents a comprehensive set of tools for assessing the linguistic abilities of bilingual children. It aims to disentangle effects of bilingualism from those of SLI, making use of both models of bilingualism and models of language impairment. The book's methods-oriented focus will make it an essential handbook for practitioners who look for measures which could be adapted to a variety of languages in diverse communities, as well as academic researchers.

**Nurturing Language and Learning** Patricia Elizabeth Spencer, Lynne Sanford Koester, 2016. Using a developmental approach, this book combines a review of up-to-date data with theory and first-hand observations to provide guidelines for development of deaf and hard-of-hearing children from birth to age 3 and ways professionals and parents can best support their learning and language development.

**Language Development and Disorders in Spanish-speaking Children** Alejandra Auza Benavides, Richard G. Schwartz, 2017-06-13. Prominent researchers from the US, Mexico, Chile, Colombia, and Spain contribute experimental reports on language development of children who are acquiring Spanish. The chapters cover a wide range of dimensions in acquisition, comprehension, and production: monolingualism and bilingualism, typical development,

children who are at risk and children with language disorders phonology semantics and morphosyntax These studies will inform linguistic theory development in clinical linguistics as well as offer insights on how language works in relation to cognitive functions that are associated with when children understand or use language The unique data from child language offer perspectives that cannot be drawn from adult language The first part is dedicated to the acquisition of Spanish as a first or second language by typically developing children the second part offers studies on children who are at risk of language delays and the third part focuses on children with specific language impairment disorders and syndromes

**Children of the 21st century** Dex, Shirley, Joshi, Heather, 2005-10-12 This book documents the early lives of almost 19 000 children born in the UK at the start of the 21st century and their families It is the first time that analysis of data from the hugely important Millennium Cohort Study a longitudinal study following the progress of the children and their families has been drawn together in a single volume The unrivalled data is examined here to address important policy and scientific issues The book is also the first in a series of publications that will report on the children's lives at different stages of their development The fascinating range of findings presented here is strengthened by comparison with data on earlier generations This has enabled the authors to assess the impact of a wide range of policies on the life courses of a new generation including policies on child health parenting childcare and social exclusion Babies of the new millennium title tbc is the product of an exciting collaboration from experts across a wide range of health and social science fields The result is a unique and authoritative analysis of family life and early childhood in the UK that cuts across old disciplinary boundaries It is essential reading for academics students and researchers in the health and social sciences It will also be a useful resource for policy makers and practitioners who are interested in childhood child development child poverty child health childcare and family policy
