Making A Killing How And Why Corporations Use Armed Force To Do Business:

Making a Killing Madelaine Drohan, 2004 Making a Killing Madelaine Drohan, 2010-08-06 A dramatic and compelling journey into the dark heart of globalization What happens when multinational corporations decide that the use of armed force is just business by other means In Making a Killing Madelaine Drohan looks at the shocking number of companies that have linked up with mercenaries warlords armies and private militias in order to make a profit In a world where multinationals often rival national governments in size and clout the implications of such partnerships are ominous What leads respectable corporations down the path to violence Drohan answers this question by examining the actions of several companies operating in Africa such as Ranger Oil West Africa which used the mercenary group Executive Outcomes to take on rebels in Angola s long running civil war and Talisman Energy whose security was provided by Sudanese army units conducting a scorched earth policy in the oil fields Drohan traces the modern roots of corporate armed force beginning with Cecil Rhodes British South Africa Company which at the turn of the century built its own army Also included is the stranger than fiction tale of ex MI5 spymaster Sir Percy Sillitoe who was hired by the De Beers diamond king to prevent the Soviet Union from acquiring smuggled diamonds in order to develop the hydrogen bomb These accounts read like adventure stories in the tradition of Rudyard Kipling and Ian Fleming but they are essential reading for anyone interested in the effects of unfettered multinational influence Making a Killing provides a road map for corporations policy makers and investors struggling to come to terms with their roles in today s increasingly globalized world **Monsters of the Market** David McNally, 2011-07-12 Monsters of the Market investigates modern capitalism through the prism of the body panics it arouses Examining Frankenstein Marx s Capital and zombie fables from sub Saharan Africa it offers a novel account of the cultural and corporeal economy of global capitalism **Corporations, Accountability and International Criminal Law** Kyriakakis, Joanna, 2021-12-09 This timely book explores the prospect of prosecuting corporations or individuals within the business world for conduct amounting to international crime The major debates and ensuing challenges are examined arguing that corporate accountability under international criminal law is crucial in achieving the objectives of international criminal justice The Ethics of Military Privatization David M. Barnes, 2016-08-25 This book explores the ethical implications of using armed contractors taking a consequentialist approach to this multidisciplinary debate While privatization is not a new concept for the US military the public debate on military privatization is limited to legal financial and pragmatic concerns A critical assessment of the ethical dimensions of military privatization in general is missing More specifically in light of the increased reliance upon armed contractors it must be asked whether it is morally permissible for governments to employ them at all To this end this book explores four areas that highlight the ethical implications of using armed contractors how armed contractors are distinct from soldiers and mercenaries the commodification of force the belligerent equality of combatants and the impact of armed contractors on the professional military While some take an

absolutist position wanting to bar the use of private military altogether this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option Recognising that outsourcing force will continue this book thus proposes some changes to account for the problems of commodification belligerent equality and the challenge to the military profession This book will be of interest to students of private security military studies ethics security studies and IR in general Canadian Books in Print. Williams,2014-08-15 One of the outstanding mysteries of the twentieth century and one with huge political resonance is the death of Dag Hammarskjold and his UN team in a plane crash in central Africa in 1961 Just minutes after midnight his aircraft plunged into thick forest in the British colony of Northern Rhodesia Zambia abruptly ending his mission to bring peace to the Congo Across the world many suspected sabotage accusing the multi nationals and the governments of Britain Belgium the USA and South Africa of involvement in the disaster These suspicions have never gone away British High Commissioner Lord Alport was waiting at the airport when the aircraft crashed nearby He bizarrely insisted to the airport management that Hammarskjold had flown elsewhere even though his aircraft was reported overhead This postponed a search for so long that the wreckage of the plane was not found for fifteen hours White mercenaries were at the airport that night too including the South African pilot Jerry Puren whose bombing of Congolese villages led in his own words to flaming huts destruction and death These soldiers of fortune were backed by Sir Roy Welensky Prime Minister of the Rhodesian Federation who was ready to stop at nothing to maintain white rule and thought the United Nations was synonymous with the Nazis The Rhodesian government conducted an official inquiry which blamed pilot error But as this book will show it was a massive cover up that suppressed and dismissed a mass of crucial evidence especially that of African eye witnesses A subsequent UN inquiry was unable to rule out foul play but had no access to the evidence to show how and why Now for the first time this story can be told Who Killed Hammarskjold follows the author on her intriguing and often frightening journey of research to Zambia South Africa the USA Sweden Norway Britain France and Belgium where she unearthed a mass of new and hitherto secret documentary and photographic evidence At the heart of this book is Hammarskjold himself a courageous and complex idealist who sought to shield the newly independent nations of the world from the predatory instincts of the Great Powers It reveals that the conflict in the Congo was driven not so much by internal divisions as by the Cold War and by the West s determination to keep real power from the hands of the post colonial governments of Africa It shows too that the British settlers of Rhodesia would maintain white minority rule at all costs *A Game as Old as Empire (Volume 1 of 2)*

Business and Conflict in Fragile States Brian Ganson, Achim Wennmann, 2018-10-25 Large scale investments in fragile states in Latin America Africa the former Soviet Union and Asia become magnets for conflict which undermines business development and security International policy responds with regulation state building and institutional reform with poor and often perverse results Caught up in old ways of thinking about conflict and fragility and an age old fight over whether multinational corporations are good or bad for peaceful development it leaves business related conflicts in fragile states to multiply and fester Surveying a new strategic landscape of business and conflict Brian Ganson and Achim Wennmann conclude that neither company shareholders nor advocates for peaceful development need or should accept the growing cost of business related conflict in fragile states Drawing on decades of experience from mainstream conflict prevention and violence reduction efforts as well as promising company practice they show that even acute conflict is manageable when dealt with pragmatically locally and on its own terms The analysis and conclusions of this Adelphi book will interest policymakers business leaders and community advocates alike all those hoping to mitigate today s conflicts while helping to reduce fragility and build a firmer foundation for inclusive development

Security Beyond the State Rita Abrahamsen, Michael C. Williams, 2010-11-18 Across the globe from mega cities to isolated resource enclaves the provision and governance of security takes place within assemblages that are de territorialized in terms of actors technologies norms and discourses They are embedded in a complex transnational architecture defying conventional distinctions between public and private global and local Drawing on theories of globalization and late modernity along with insights from criminology political science and sociology Security Beyond the State maps the emergence of the global private security sector and develops a novel analytical framework for understanding these global security assemblages Through in depth examinations of four African countries Kenya Nigeria Sierra Leone and South Africa it demonstrates how global security assemblages affect the distribution of social power the dynamics of state stability and the operations of the international political economy with significant implications for who gets secured and how in a global era
