Architecture Series: Bibliography, 1979 *Post-Western Histories of Architecture* Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23 This book seeks to provide an alternative post Western perspective to the history of contemporary architecture It puts forward detailed critical analyses of various areas of the world including Europe Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book's main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies *A Companion to Modern African Art* Gitti Salami, Monica Blackmun Visona, 2013-10-22 Offering a wealth of perspectives on African modern and Modernist art from the mid nineteenth century to the present this new Companion features essays by African European and North American authors who assess the work of individual artists as well as exploring broader themes such as discoveries of new technologies and globalization A pioneering continent based assessment of modern art and modernity across Africa Includes original and previously unpublished fieldwork based material Features new and complex theoretical arguments about the nature of modernity and Modernism Addresses a widely acknowledged gap in the literature on African Art *Tropical Toolbox* Jacopo Galli, 2022-03-24 Edwin Maxwell Fry and Jane Drew are two key figures of British architecture in the second half of the twentieth century their most important work was the book *Tropical Architecture in the Dry and Humid Zones* a manual compiled from the experience acquired in Ghana and Nigeria between 1949 and 1960 The manual is the formalisation of a design method specific for tropical areas the search for a renewed rooting of modern architecture not based on formal research or the revival of folkloric themes but on the close relationship between environmental support and anthropic intervention The design method has its roots in African colonial history and was the result of a long process of adaptation of

Western modernist ideas to the extreme climatic conditions of the African continent A cosmopolitan localism based on the application of science in humanistic terms and capable of combining global and local dimensions was translated into an approach that respected the deep roots of tradition while providing innovation in terms of architectural solutions Colonial Architecture and Urbanism in Africa Fassil Demissie, 2012 Colonial architecture and urbanism carved its way through space ordering and classifying the built environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played a pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa
