Britt, Michael R. Gottfredson, 2017-11-30 For the past twenty to thirty years control theories of crime have been at the center of theoretical development in criminology Key to the control theory perspective is the notion that crime is an inherently individual act and its explanation requires that we focus on the characteristics of individuals who commit crimes Consequently control theory focuses on such issues as self control and social control The contributions to this volume explicate and extend the application of control theory It is divided into three general areas Part 1 focuses on key assumptions and components of control theories

Contributors discuss the notion of learning or socialization in the context of control theory and the effects that families peers and the criminal justice system have on self control social ties and criminal behavior Part 2 applies control theory to areas typically assumed to be out of the domain of self control theory and social control theory such as gender differences in crime domestic violence and group crime Considering control theory s emphasis on explaining individual criminal acts these chapters suggest an interesting area of development by highlighting the possibility that differences in crime across or within groups may begin with individual characteristics and then making inferences about groups and group processes Part 3 approaches the explanation of crime cross nationally and at the macro level Although the authors take different approaches they all illustrate that a theory of crime does not require culture specific elements in order to be a valid cross cultural explanation Contributors to this volume include Robert Agnew Todd Armstrong Leana Allen Bouffard Augustine Brannigan Chester Britt Barbara Costello Maja Dekovic Matt DeLisi Michael Gottfredson Henriette Haas Kelly H Hardwick Travis Hirschi Marianne Junger Martin Killias Helen Mederer Kevin Thompson and Alexander Vazsonyi Social Control and Self-Control Theories of Crime and Deviance L. Edward Wells,2017-07-05 Control theories have dominated criminological theory and research since the 1969 publication of Hirschi s seminal work on the social bond Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses thus indicating that their main concerns are the explication and clarification of the techniques processes and institutions of informal social control The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory the central importance of parents peers and schools in the creation of informal control mechanisms and their link to crime and delinquency the theoretical underpinnings of self control theory including empirical tests and criticisms and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency

described can scarcely be overstated Social control theory has been empirically tested or commented on by hundreds of scholars and is generally regarded as one of the three dominant theories of crime The current work highlights the impact that social control theory has had on criminological theory and research to date Agnew s contribution highlights the role that Hirschi s tests of control versus strain theory had in contributing to the near demise of classic strain theories and to the subsequent development of general strain theory Serrano Maillo relates control to drift and Tedor and Hope compare the human nature assumptions of control theory to the current psychological literature Other contributions return to Hirschi s original Richmond Youth Survey RYS data and demonstrate the robustness of Hirschi s major findings Costello and Anderson find strong support for Hirschi s predictions in an analysis of a diverse group of youths in Fayetteville Arkansas in 1999 Nofziger similarly finds support for Hirschi s predictions with an analysis of the girls in the RYS and explores the criticisms of social control theory that were the result of Hirschi s failure to analyze the data from the girls in the sample Kempf Leonard revisits her seminal 1993 survey of control theory and reviews the current empirical status of control theory Other contributions explore new directions for both social control theory and self control theory The contribution by Cullen Lee and Butler holds that one element of the social bond commitment was under theorized by Hirschi and the authors present a more in depth development of the concept Quist explores the possibility of expanding social control theory to explicitly incorporate exchange theory concepts Ueda and Tsutomi apply control theory cross culturally to a sample of Japanese students and Felson uses control theory to organize criminological ideas Vazsonyi and Javakhishvili s contribution is an empirical analysis of the connections between social control in early childhood and self control later in life Chapple and McQuillan s contribution suggests that the gender gap in delinquency is better explained by increased controls in girls than by gendered pathways to offending Oleson traces the evolution of Hirschi s control theory and suggests that given the relationships between fact and theory a biosocial model of control might be a promising line of inquiry Fifty Years of Causes of Delinquency The Criminology of Travis Hirschi describes the current state of control theory and suggests its future directions as well as demonstrates its enduring importance for criminological theory and research The volume will be of interest to scholars working in the control theory tradition as well as those critical of the perspective and is suitable for use in graduate courses in criminological theory
