New Economy And Economic Growth In Europe And The U S:

The New Economy and Economic Growth in Europe and the US David B. Audretsch, Paul J.J. Welfens, 2002-04-10 There are many issues relating to the new economy in Europe and the USA that are unexplored. Here the authors present innovative theoretical and empirical analysis on Internet dynamics, productivity growth and organizational changes in selected OECD countries. New empirical findings related to telecommunications, Internet and growth also are presented. Based on the theoretical and empirical analyses, various policy options are developed. Policy measures both at the regional and national levels can stimulate structural change, knowledge diffusion and economic growth. Different governance strategies for the Internet and e-commerce are identified from a global perspective.

The New Economy and Economic Growth in Europe and the US David B. Audretsch, Paul J.J. Welfens, 2013-06-29 The strong productivity growth of the US and Scandinavian countries in Europe in the 1990s has raised the question whether the ICT sector, information and communication technology that is computers plus telecommunications plus digital services, is the new driving engine of high growth in leading OECD countries. Judging by the empirical evidence for the US, including a new study by McKinsey which gives mixed evidence, it is still too early to clearly dismiss Robert G. Gordon's hypothesis that the acceleration of US output growth is due to cyclical factors and increased productivity growth in the computer sector. The counter hypothesis is associated with research by Stiroh and others who argue that there are positive productivity spillover effects from ICT to other sectors. Indeed, it is not clear ex ante whether mainly the Old Economy or the so-called New Economy stands to benefit most from high innovation rates and strong productivity shifts associated with the spreading of digital services. Interestingly, the increased economic role of the Internet also contributes to the internationalization of the economy since more services have become tradable and growing import competition itself could stimulate productivity growth and thus contribute to higher growth. If ICT plays a key role in the new economy, there are important implications in the differential degree to which Germany and the US have implemented ICT.

The New Economy and Economic Growth in Europe and the US David B. Audretsch, Paul J. J. Welfens, 2014-01-15 *Economic Opening Up and Growth in Russia* Evgeny Gavrilin, Paul J.J. Welfens, Ralf Wiegert, 2004-01-21 After a decade of sharp economic decline, Russia switched to an impressive period of economic growth. Yet the economic record is still mixed and many key problems remain unresolved both in the economic sphere and the political system. The focus is on economic dynamics in Russia, reasons for its hesitant opening up process as well as the special role of the natural resources sector which is expected to continue to grow. This analysis highlights the existing deficiencies of the Russian economic system and raises doubts about the sustainability of growth. Twin focus is on required reforms and endogenous forces that impair liberalizing trade and investment in an orderly way. Russian discussions on WTO and other international topics are reflected.

The Economic and Financial Market Consequences of Global Ageing Kieran McMorrough, Werner Röger, 2012-11-07

Many countries will be confronted with ageing populations in the coming decades. This will crucially affect the economic outlook for the economy. Population changes directly affect the size of the labour force and consequently potential employment and output growth. In addition, changes in demographic trends strongly influence savings and investment behaviour, the outlook for the public finances, a range of financial market variables, and more controversially may impact on the pace of productivity growth in an economy. Because the timing and magnitude of demographic changes varies significantly across regions, international capital flows will play an important role for the allocation of investment. This book offers a comprehensive treatment of ageing related issues based on a five region overlapping generations model and provides a quantitative assessment until 2050. *Real and Financial Economic Dynamics in Russia and Eastern Europe* Timothy

Lane, Nina Oding, Paul J.J. Welfens, 2012-12-06. Russia and many other transition countries are now facing the challenges of opening up, restructuring and modernizing their economies, which requires addressing numerous institutional weaknesses and supply side distortions. From a regional perspective, drawing on the experience of other reforming countries, the papers examine these issues. Aspects addressed include the implications of trade and capital flows, the process of labor market reform, financial market development, productivity growth and innovation dynamics. The dynamics of the reform process are also studied in the context of new political economy models. Internet, Economic Growth and Globalization Claude E.

Barfield, Günter S. Heiduk, Paul J.J. Welfens, 2012-11-02. The dynamics of the digital economy in the US, Europe and Japan are rather different. Some EU countries come close to the USA as the leading OECD country in the new economy, but Japan faces particular problems in catching up digitally. Information and communication technology will affect productivity growth, production, the financial system and trade. Setting adequate rules for the digital economy at the national and international level is a key challenge for industrialized countries. Moreover, cultural and organizational challenges will also have to be met.

EU - ASEAN Paul J.J. Welfens, Suthiphand Chirathivat, Franz Knipping, 2008-12-21. Economic globalisation is a long term international process in which the roles of the EU, ASEAN, Korea, Japan and China are of increasing importance. Trade dynamics and foreign investment as well as regional policy cooperation in Europe and Asia are discussed here along with historical developments. Moreover, the book highlights links between European Community law and WTO regulations. The key challenges posed by China's economic expansion are part of the analysis. Specific issues concern international outsourcing and off shoring as well as regional economic integration in a period of financial globalisation. Based on historical dynamics, theoretical analysis and global shifts, policy solutions for Europe, Asia and the world economy can be arrived at. The book offers clear policy options and also reveals crucial issues in terms of the welfare analysis of regional integration. **The European Economy in an American Mirror** Barry Eichengreen, Dieter Stiefel, Michael Landesmann, 2007-10-04. Europe's economy is under strain due to lagging productivity growth, population ageing, the difficulties of adjustment in an enlarged European Union and the challenges of globalization. In comparison with America, rates of growth of GDP per capita and

labour productivity growth are anaemic raising questions about the viability of a distinct Europe

Welfens, 2006 Broadening and deepening of economic and political integration are hallmarks of the EU and ASEAN Analysing the economic and institutional changes in both Europe and Asia this book emphasizes on banking financial market dynamics ICT and macroeconomic policies The legal aspects are combined with historical and economic perspectives

50 Years of EU Economic Dynamics Richard Tilly, Paul J.J. Welfens, Michael Heise, 2007-11-09 On the occasion of the 50th anniversary of the European Union experts present their analyses of historical developments and new economic challenges for the EU After a reflection on historical dynamics the contributors point out the dramatic economic shifts between Europe Asia and the US Representatives from major central banks including the ECB other leading banks and academia analyze the dynamics of the Eurozone and financial market integration in the context of globalization and economic growth Furthermore the authors discuss the challenges of information and communication technologies by means of various country analyses Moreover the Schumpeterian prospects for Europe and the Lisbon Agenda the long term challenges of EU pension reforms emission trading systems in the EU and options for a new EU constitution are highlighted At the bottom line of this EU analysis are major implications for investors managers policy makers and the public at large in both the EU and the global economy

Divergences in Productivity Between Europe and the United States Gilbert Cetté, Michel Fouquin, Hans-Werner Sinn, 2007-01-01 Papers from a seminar held at the Royaumont Abbey on 22 and 23 March 2004 and organized by the Banque de France CEPII and the Ifo Institute for Economic Research at the University of Munich

Digitalization in Open Economies Michael Vogelsang, 2010-03-20 Digital strings are not visible but affect all economic segments This book studies the phenomenon of digitalization with the instruments of economics in order to explore the interdependencies between digitalization economic policy and macroeconomic variables of open economies Digitalization is separated into the three components networks IT services and digital goods which are then incorporated into macroeconomic models of trade theory in open economies This approach allows to formally describe the cross effects between digitalization and macroeconomic variables of a country Specifically it is used to analyze interdependencies between macroeconomic variables and networks IT services and digital goods and to determine the challenges of digitalization for economic policy and regulation Innovations in Macroeconomics Paul J.J. Welfens, 2008-06-20 Modern macroeconomics suffers from an unclear link between short term Keynesian analysis and long term growth modelling Moreover product and process innovations have been only partially integrated The analysis suggests new approaches to innovations in open economies in many ways including the Schumpeterian Mundell Fleming model and new monetary growth models A specific focus is on the role of innovations for output employment and exchange rate developments A new link between monetary analysis and growth modelling in open economies is presented Structural change innovations and growth are considered from a new perspective Energy innovation dynamics are also considered With respect to economic policy in particular innovation policy the analysis implies major changes concerning both EU countries and other leading OECD economies **U.S.-E.U.
