Biodiversity Conservation Charles A. Perrings, Karl-Göran Mäler, Carl Folke, C.S. Holling, Beng-Owe Jansson, 1995-06-30
 This book reports the more policy oriented results of the Biodiversity programme of the Royal Swedish Academy of Sciences Beijer Institute The programme brought economists and ecologists together to

consider where the problem in biodiversity loss really lies what costs it has for society and how it might best be addressed The results are strikingly different from those reported in other works on the subject Biodiversity loss matters for all ecosystems not just the megadiversity tropical forests And it matters because it compromises the resilience and so the productivity of those systems Biodiversity conservation requires the development of policies that change the behaviour of resource use everywhere not just in parks and reserves The book is required reading for researchers and policy makers alike It canvasses options for the reform of park management biodiversity conservation projects property rights tax trade and price regimes that are within the reach of governments everywhere Biodiversity Conservation C. A. Perrings, 2012-12-06

This volume is one of a number of publications to carry the results of the first research programme of the Royal Swedish Academy of Science s Beijer Institute The Institute was formed in 1991 in order to promote interdisciplinary research between natural and social scientists on the interdependency between economic and ecological systems In its first research programme the Biodiversity Programme the Institute brought together a number of leading economists and ecologists to address the theoretical and policy issues associated with the current high rates of biodiversity loss in such systems whether the result of direct depletion the destruction of habitat or specialisation in agriculture forestry and fisheries l This volume reports some of the more policy oriented work carried out under the programme The broad aim of the programme is to further our understanding of the causes and consequences of biodiversity loss and to identify the options for addressing the problem The results have turned out to be surprising to those who see biodiversity loss primarily in terms of the erosion of the genetic library In various ways the work carried out under the programme has already begun to alter our perception of where the problem in biodiversity loss lies and what policy options are available to deal with it Indeed the programme has provided a powerful set of arguments for reappraising not just the economic and ecological implications of biodiversity loss but the whole case for development based on specialisation of resource use Marine and Coastal Protected Areas Rodney V. Salm, John R. Clark, Erkki Siirila, 2000 This is a new edition of the classic textbook on marine protected area MPA management in the tropics originally produced as an output of the Bali World Parks Congress in 1982 Approaches to planning and managing MPAs have evolved considerably Major advances include innovative financing mechanisms partnerships with the private sector and NGOs and collaborative management between government and coastal communities These advances have brought new approaches for MPA establishment and management that are more participatory involving communities through interaction and collaboration rather than prescription With new case studies and illustrations the guide comes in a water resistant cover for field use It is intended for those who plan individual and or national MPA systems and gives philosophical context for MPAs along with some basic principles and approaches **Reef Smart Guides Bonaire** Peter McDougall, Ian Popple, Otto Wagner, 2018-12-15 The Definitive Guide to Bonaire Scuba Diving and Snorkeling With a mapping style and key information presented in a way that really prepares you for each dive site this book is exactly what

divers want Ocean Frontiers 1 Best Seller in Water Sports Barbados and Grand Cayman Diving Bonaire George Lewbel, George S. Lewbel, Larry R.
