unimpressive at first sight but it considerably complicates life for Caro Kann players as it makes Black's main problem bigger the development of his bishop on c8. Small wonder that an increasing number of strong grandmasters such as Vassily Ivanchuk, Alexander Morozevich and Judit Polgar have incorporated this move in their repertoire. After 3 f3 the bishop on c8 has nowhere to go and Black will often struggle to avoid enduring problems. White's chances to obtain an advantage are substantial as Bezgodov shows in this fascinating new chapter in modern chess opening theory packed with original analysis and clear explanations.

New Art of Defence in Chess Andrew Soltis, 2030-01-01 Most chess games are not won they are lost. Many instructional chess books tell you how to improve a position when it is already or may be favourable. This book offers help when you definitely do not have the advantage. Every chess player needs a sound arsenal of defensive techniques. This book covers them all: counterplay when to accept sacrifices, how to anticipate short and long term threats and how to minimise losses. It also helps you create a strong underlying psychological framework for defensive technique; it teaches you how to stay cool under fire, how to stonewall and how to exploit your opponent's weaknesses.

It is a firm favourite of grandmasters past and present including Karpov, Petrosian, Capablanca and Anand. Examining classic games to demonstrate key moves in action, Engqvist brings the defence to life and provides you with the knowledge you need to put strategy into practice.
