Securing the Global Economy Andreas Freytag, Paolo Savona, 2016-04-01 Securing the Global Economy explores how and why the G8 and other institutions of global governance deal with increasingly comprehensive and complex economic security connections These connections are explored from an interdisciplinary perspective with economists political scientists and those in the policy world bringing their insights to bear Moreover this volume explores this economic security connection from a constitutional or institutional perspective In a classical liberal spirit it is concerned with the organizing principles of a liberal international economic order and the framework of rules that enables it to survive and flourish Security issues national trade policies the multilateral trade system and the detailed technical issues they subsume are analysed from this higher vantage point This is thus a work about global governance as a whole and at its core rather than a problem solving manual for a few of the issues now at centre stage Furthermore it applies this larger vision to the current G8 and global economic security agenda to generate a set of policy recommendations about how the global community through and outside the G8 can better cope with the complex interconnected challenges it now confronts Its innovative policy recommendations are especially timely when the recent global financial crisis economic recession and fragile recovery place great strains on the liberal economic order while new challenges from Iran ongoing terrorist threats and corruption make this security economic connection critically important

from the perspectives of [The Oxford Handbook of Africa and Economics](#) Célestin Monga, Justin Yifu Lin, 2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

Macroeconomics for Developing Countries Raghbendra Jha, 2003-04-24 This comprehensively revised and updated edition develops the themes presented in the first edition Students and teachers who are familiar with the book will notice entirely new chapters as well as significant revision and updating of existing chapters to take into account global economic changes since the turn of the millennium With qu [What's Wrong with Rights?](#) Radha D'Souza, 2018-01-20 Through mapping the rights discourse and the transformations in transnational finance capitalism since the world wars and interrogating the connections between the two Radha D Souza examines contemporary rights in theory and practice through the lens of the struggles of the people of the Third World their experiences of national liberation and socialism and their aspirations for emancipation and freedom Social movements demand rights to remedy wrongs and injustices in society But why do organisations like the World Bank and IMF the G7 states and the World Economic Forum want to promote rights Activists and activist scholars are critical of human rights in their diagnosis of problems But in their prognosis they reinstate human rights and bring back through the backdoor what they dismiss through the front Why are activists and activist scholars unable to let go of human rights Why do indigenous peoples find the need to invoke the UN Declaration on Rights of Indigenous People to make their claims sound reasonable Are rights in the 20th and 21st centuries the same as rights in the 17th and 18th centuries This book examines what is entailed in reducing rights to human rights and in the argument our
