Breaking the Boundaries B. Sanyal, 2013-03-09 Exploring the complex arena of international planning for development has until now been uniquely the privilege of influential senior western planners This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe At a time of increasing enrollment of foreign students in North American planning programs the emergence of a new voice has coincided with a

growing skepticism worldwide about old notions of planning and development in poorer and ex colonial countries Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools Breaking the Boundaries presents their views and those of concerned colleagues about the need for a radically changed curriculum based on a comparative one world approach to planning education Their personal experiences as young expatriate scholars and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change Through candid reflections and perceptive critiques of their own field the spatial environmental social design and communications disciplines the contributors explore crucial issues in development planning from theoretical and professional practice perspectives

Community-Based Urban Development Im Sik Cho, Blaž Križnik, 2016-12-04 The book compares different approaches to urban development in Singapore and Seoul over the past decades by focusing on community participation in the transformation of neighbourhoods and its impact on the built environment and communal life Singapore and Seoul are known for their rapid economic growth and urbanisation under a strong control of developmental state in the past However these cities are at a critical crossroads of societal transformation where participatory and community based urban development is gaining importance This new approach can be seen as a result of a changing relationship between the state and civil society where an emerging partnership between both aims to overcome the limitations of earlier urban development The book draws attention to the possibilities and challenges that these cities face while moving towards a more inclusive and socially sustainable post developmental urbanisation By applying a comparative perspective to understand the evolving urban paradigms in Singapore and Seoul this unique and timely book offers insights for scholars professionals and students interested in contemporary Asian urbanisation and its future trajectories

Squatter Settlements and Housing Policy Edward Popko, 1980 **Lost Informal Housing in Istanbul** F. Yurdanur Dulgeroglu-Yuksel, 2022-11-14 The dynamics of globalization brought a radical change in megacities and tensions between the stakeholders and dwellers against top down urban renewal policies This unique book provides a worldview of multi stakeholders in the urban housing market With a longitudinal research approach it paves the way for interdisciplinary

researchers to critically assess the urban renewal projects and update such studies The urban renewal processes are implemented without participation and the book highlights field based information for policymakers The reader will find with the information provided from the field why participation is necessary for a sustainable urban development why there are different types of urbanizations and how it works under different conditions Better understanding of the challenges of urban renewal processes in the world cities is intended with the focus on the changing informal settlements Istanbul is a megacity housing more than half of its dwellers in informal settlements After many decades of self upgrading and silently communicating with the local authorities the informal sector had become adapted and maintained its living spaces Unexpectedly the end of the first decade of the 21st century marked a radical urban land valuation and international investments Top down interventions started with naming Istanbul the 2010 European Capital of Culture Then came the Law of Urban Transformation which meant the fast decline of squatter housing and the speedy loss of its cultural value of the mahalle spirit place identity The book will raise curiosity on why the time has come to change the perspectives about the informal urban sector

The Roots of Urban Renaissance Brian D. Goldstein,2023-03-14 An acclaimed history of Harlem's journey from urban crisis to urban renaissance With its gleaming shopping centers and refurbished row houses today's Harlem bears little resemblance to the neighborhood of the midcentury urban crisis Brian Goldstein traces Harlem's Second Renaissance to a surprising source the radical social movements of the 1960s that resisted city officials and fought to give Harlemites control of their own destiny Young Harlem activists inspired by the civil rights movement envisioned a Harlem built by and for its low income predominantly African American population In the succeeding decades however the community based organizations they founded came to pursue a very different goal a neighborhood with national retailers and increasingly affluent residents The Roots of Urban Renaissance demonstrates that gentrification was not imposed on an unwitting community by unscrupulous developers or opportunistic outsiders Rather it grew from the neighborhood's grassroots producing a legacy that benefited some longtime residents and threatened others
