**New Directions in MIS Management** Robert J. Thierauf, 1988-11-15 Thierauf's work develops a number of interesting and potentially useful approaches to management information systems MIS practice The author presents a number of techniques some well known others more recent that practicing MIS managers may adopt to facilitate effective MIS planning for the 1990's by focusing on problem finding rather than on problem solving A primary recommendation of Thierauf's is the restructuring of the MIS organization using a functional end user departmental approach Discussed at length are various issues relevant to this restructuring such as staffing motivating MIS personnel and end users and MIS soft controls Recommended for upper level undergraduate and graduate students as well as practicing managers and MIS specialists Choice With new developments in hardware and software MIS managers are increasingly faced with the need to develop more sophisticated managerial as opposed to purely technical skills Here an acknowledged expert in the field of information systems draws on his own original

research and experience to develop a set of workable strategies and techniques that MIS managers can use to function more effectively as we move into the next decade Thierauf identifies probable trends in the field in coming years and outlines ways in which MIS managers can anticipate predictable problems apply improved management skills to the end user interface and effectively motivate MIS personnel Thierauf concentrates particularly on four major areas of managerial responsibility planning organizing motivating and controlling In planning he shows how to use problem finding techniques to anticipate and solve potential problems between MIS personnel and end users To help reduce this conflict Thierauf argues there is a need for a new direction in organizing MIS departments He proposes bringing MIS and end use departments together by using a functional departmental approach In motivating MIS personnel there is need to go beyond self actualization by emphasizing mutual actualization as well as self donation Finally in the area of control Thierauf advocates the use of soft controls to replace stringent controls that have had a tendency to restrict personal freedom on the job A common thread throughout the discussion is a focus on effective guidelines for the MIS manager to follow in order to come to grips with the changing realities of the 1990s

*Competitive Freedom Versus National Security Regulation* Manley R. Irwin, 1989-01-23 Irwin asserts that the federal government in the name of preserving national security has imposed such additional regulation on American businesses that their competitive position in global markets has been severely compromised In his well written cogently argued account of the impact of national security regulations on competitive freedom Irwin demonstrates that federal government agencies the Departments of State Commerce and Defense the National Technical Information Services the Federal Communications Commission and others all attempt to micromanage the firm s decision to sell buy invest innovate and compete internationally In addition Irwin shows jurisdictional disputes among the various federal agencies for control over corporate economic activities further exacerbate the problem by hampering the corporation s ability to react quickly to market conditions As his analysis clearly illustrates the end result is a price cost squeeze on U S firms that handicaps their ability to compete with overseas rivals Some of the results of increased government oversight Irwin identifies directly threaten overall U S competitiveness abroad U S corporations find that the compliance cost of regulation is privatized thus lifting total costs

The combination of dampened revenues and inflated costs curtails the resources for future product development a vital factor in maintaining market position And Irwin demonstrates this federal policy which acts to reward offshore rivals at the expense of U S firms is grounded on political consensus the political right favors export control while the political left supports import control The effect of this dual policy emphasis Irwin argues is a national security policy that serves to punish the U S firm in an environment of increased global risk competition and rivalry Students of international business and public policy as well as government decision makers themselves will find Irwin s study enlightening and provocative *Computers in Human Behavior* ,1993
