Between Class and Elite Zygmunt Bauman, 1972 Historical study of the labour movement in the UK from 1750 to 1955 with particular reference to the sociological aspects of the role of trade union leadership as an Elite group within the working class covers the evolution of the labour political party political leadership etc References and statistical tables *Elites and People* Fredrik Engelstad, Trygve Gulbrandsen, Marte Mangset, Mari Teigen, 2019-10-07 This volume contains an Open Access chapter The present volume of Comparative Social Research offers a broad set of comparative studies of elites stretching from the Arab Spring in Tunisia and Egypt to women s political leadership in Brazil and Germany via attainment of elite positions among minorities in France and the US **Elite Mobilities** Thomas Birtchnell, Javier Caletrió, 2013-08-22 Small in number but great in influence mobile elites have shaped the contours of global capitalism Today these elites continue to flourish globally but in a changing landscape The current economic crisis and rising concerns about the moral legitimacy of extreme wealth coincides with stern warnings over the risks posed by climate change and the unsustainable use of resources Often an out of bounds topic in critical social science elites are thought of as too inaccessible a group to interview and too variable a minority to measure This groundbreaking collection sets out to challenge this perception Through the careful examination of the movements of the one per cent through the everyday spaces of the ninety nine per cent **Elite Mobilities** investigates the shared zones elites inhabit alongside the commons the executive lounge in the airport the penthouse in the hotel or the gated community next to the slum Bringing together the pioneer scholars in critical sociology today this collection explores how social scientists can research map and track the flows and residues of objects wealth and power surrounding the hypermobile **Elite Mobilities** sets a new benchmark in social science efforts to research the powerful and the privileged It will appeal to students and scholars interested in mobilities transport tourism social stratification class inequality consumption and global environmental change **Global Elites** A. Kakabadse, 2011-12-12 Exploring the nature configuration and influence of global elites this book examines the impact of elites on transnational policy development and strategically on corporations as board members of PLCs and international joint ventures Overall the book provides a balanced view of how our present day elites operate The Rise and Fall of Elites Vilfredo Pareto, 2017-09-08 Combining a thorough introduction to the work of nineteenth and early twentieth century Italian social theorist Vilfredo Pareto with a highly readable English translation of Pareto s last monograph *Generalizations* originally published in 1920 this work illustrates how and why democratic forms of government undergo decay and are eventually reinvigorated More than any other social scientist of his generation Pareto offers a well developed articulate and compelling theory of change based on a Newtonian vision of science and an engineering model of social equilibrium This dynamic involves a shifting balance among the countervailing forces of centralization and decentralization of power economic expansion and contraction and liberalism versus traditionalism in public sentiment By 1920 Pareto had developed a scheme for predicting shifts in magnitude of these

forces and subsequent change in the character of society This book will be of interest to students teachers or general readers interested in political science sociology and late nineteenth early twentieth century social theory

International Multiparty Mediation and Conflict Management Sinisa Vukovic, 2015-10-05 This volume aims to provide a detailed explanation of the effects of cooperation and coordination on international multiparty mediation in conflicts Contemporary scholarship stresses that the crucial ingredients for a successful multiparty mediation are consistency in interests and cooperation and coordination between mediators This book seeks to supplement that understanding by investigating how much the consistency of interests and cooperation and coordination affect the overall process and what happens to the mediation process when mediating parties do not share the same idea and interest in finding a common solution At the same time it explores the obstacles in achieving coordination and coherence between various mediators in such an environment and how to surmount the problems that multiple mediators face when operating without a common script in attempting to mediate a negotiated settlement The study investigates three distinct mechanisms both on the systemic and contextual level that have the potential to deter defection from a potential member of the multiparty mediation coalition geo political shifts changes in the conflict dynamics and mediators ability to bargain for a cooperative relationship As the number of states and international actors that are involved in mediation increases a careful assessment is necessary not only of their relative institutional strengths and weaknesses but also of how to promote complementary efforts and how to synchronize the whole process when one actor is transferring the responsibilities for mediation to others This book will be of much interest to students of mediation conflict management war and conflict studies security studies and IR The Open Access version of this book available at <https://www.routledge.com/International-Multiparty-Mediation-and-Conflict-Management-Challenges-of-Vukovic/p/book/9781138087897> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Elites in Transition Heinrich Best, Ulrike Becker, 2013-11-11 Who rules in Eastern Europe became a fundamental question for western researchers and other observers after communist regimes were established in the region and it gained further importance as state socialism expanded into Central Europe after the Second World War A political order which according to Leninist theory of the state and to subsequent Stalinist political practice was primarily a highly centralised and repressive power organisation directed as if it were natural researchers attention towards the highest echelon of office holders in party and state Extreme centralisation of power in these regimes was consequently linked to an elitist approach to analysing them from a distant viewpoint It is one of the many paradoxes of state socialism that a social and

political order which presumptuously claimed to be the final destination of historical development and to be based on deterministic laws of social evolution which claimed an egalitarian nature and denied the significance of the individual was perceived through the idiosyncrasies rivalries and personal traits of its rulers The largest part of these societies remained in grey obscurity only occasionally revealing bits of valid information about a social life distant from the centres of power It is debatable whether this top headedness of western research into communist societies created a completely distorted picture of reality however it certainly contributed to an overestimation of the stability of these regimes an underestimation of their factual diversity and a misjudgement of the extent of conflicts and cleavages dividing them **Toward a European**
