Taber,2018-03-13 This book is an appreciation of the long and illustrious career of Milton Lodge Having begun his academic life as a Kremlinologist in the 1960s Milton Lodge radically shifted gears to become one of the most influential scholars of the past half century working at the intersection of psychology and political science In borrowing and refashioning concepts from cognitive psychology social cognition and neuroscience his work has led to wholesale transformations in the way political scientists understand the mass political mind as well as the nature and quality of democratic citizenship In this collection Lodge s collaborators and colleagues describe how his work has influenced their own careers and how his insights have been synthesized into the bloodstream of contemporary political psychology The volume includes personal reflections from Lodge s longstanding collaborators as well as original research papers from leading figures in political psychology who have drawn inspiration from the Lodgean oeuvre Reflecting on his multi faceted contribution to the study of political psychology *The Feeling Thinking Citizen* illustrates the centrality of Lodge s work in constructing a psychologically plausible model of the democratic citizen *African American Perspectives on Political Science* Wilbur Rich,2007-01-15 Race matters in both national and international politics Starting from this perspective *African American Perspectives on Political Science* presents original essays from leading African American political scientists Collectively they evaluate the discipline its subfields the quality of race related research and omissions in the literature They argue that because Americans do not fully understand the many faceted issues of race in politics in their own country they find it difficult to comprehend ethnic and racial disputes in other countries as well In addition partly because there are so few African Americans in the field political science faces a danger of unconscious insularity in methodology and outlook Contributors argue that the discipline needs multiple perspectives to prevent it from developing blind spots Taken as a whole these essays argue with great urgency that African American political scientists have a unique opportunity and a special responsibility to rethink the canon the norms and the directions of the discipline **Doing Research in Political Science**
