working in the field of religious education in the public sphere **Religious Education** ,1919 *Rethinking Religious Education and Plurality* Robert Jackson,2013-02-01 How should schools deal with religions in matters of curriculum procedure and policy As Western society becomes increasingly multicultural in character schools must reassess the provision of religious education and look at how they might adapt in order to accommodate students diverse experiences of plurality This book offers a critical view of approaches to the treatment of different religions in contemporary education in order to devise approaches to teaching and learning and to formulate policies and procedures that are fair and just to all Beginning with a contextual overview of the religious social and cultural changes of the past fifty years the book goes on to illuminate and assess six different responses to the challenges posed by religious plurality in schools Conclusions are drawn from the various positions explored in this book identifying what the character of religious education should be how it should be taught and addressing the issues raised for policy practice and research *Rethinking Religious Education and Plurality* argues for a plural approach to education and will be a valuable resource for students and researchers studying courses in religious education as well as teachers education advisers and policy makers Crisis, Controversy and the Future of Religious Education L. Philip Barnes,2019-12-05 *Crisis Controversy and the Future of Religious Education* sets out to provide a much needed critical examination of recent writings that consider and respond to the crisis in religious education and more widely to a crisis in non confessional forms of religious education wherever practised The book is critical wide ranging and provocative giving attention to a range of responses some limited to the particular situation of religious education in England and some of wider application for example that of the role and significance of human rights and that of the relevance of religious studies and theology to religious education It engages with a variety of positions and with recent influential reports that make recommendations on the future direction of religious education Constructively it defends both confessional and non confessional religious education and endorses the existing right of parental withdrawal Controversially it concludes that the case for including non religious worldviews in religious education and for the introduction of a statutory objective national religious education curriculum for all schools are both unconvincing on educational philosophical and evidential grounds Timely and captivating this book is a must read for religious and theological educators RE advisers classroom teachers student teachers and those interested in the field of religious education **International Journal of Religious Education** ,1924 **Religious Education in a Global-Local World** Jenny Berglund,Yafa Shanneik,Brian Bocking,2016-07-15 This book examines Religious Education RE in over ten countries including Australia Indonesia Mali Russia UK Ireland USA and Canada Investigating RE from a global and multi interdisciplinary perspective it presents research on the diverse past present and possible future forms of RE In doing so it enhances public and professional understanding of the complex issues and debates surrounding RE in the wider world The volume emphasizes a student centred approach viewing any kind of RE or its absence as a formative lived experience for pupils It stresses a bottom up

sociological and ethnographic anthropological research based approach to the study of RE rather than the top down approaches which often start from prescriptive legal ideological or religious standpoints The twelve chapters in this volume regard RE as an entity that has multiple and contested meanings and interpretations that are constantly negotiated For some RE means religious nurturing either tailored to parental views or meant to inculcate a uniform religiosity For others RE means learning about the many religious and non religious world views and secular ethics that exist not promoting one religion or another Some seek to avoid the ambiguous term religious education replacing it with terms such as education about religions and beliefs or the religious dimension of intercultural education
