Evolution of Evolution Richard Littleton Guarrant, 2018-09-30 Numerous scholarly articles and books have been written about biologic and social evolution compassion life's meaning violence and predictions of future outcomes However what is not often addressed but is increasingly desperately needed is the realization of the evolutionary survival value of caring for others This book strives to link our humanities and religious philosophies to a scientific understanding of human destiny and provide a key to meaning in our lives Though this idea has incubated for over two decades recent extremism in Charlottesville and global threats of inhumanity and violence make this more timely than ever for all who care about who we are and our children's future Furthermore our capacity for benefit or destruction of Homo sapiens or civilization as we know it sets a ticking timer on the urgency of this realization and focused action we don't have forever to get it

Guided Evolution of Society Bela H. Banathy, 2013-03-09 Based on a comprehensive review of human and societal evolution the book develops an approach to conscious self-guided evolution In the course of the evolutionary journey of our species there

have been three seminal events The first happened some seven million years ago when our humanoid ancestors entered on the evolutionary scene Their journey toward the second crucial event lasted over six million years when as the greatest event of our evolutionary history homo sapiens sapiens started the revolutionary process of cultural evolution Today we have arrived at the threshold of the third major event the revolution of conscious evolution when it becomes our responsibility to enter into the evolutionary design space and guide the evolutionary journey of our species The book tells the story of the first six million years of the journey in just enough detail to understand how evolution had worked in times when it was primarily biological driven by natural selection With the human revolution some fifty thousand years ago with the emergence of self reflective consciousness the evolutionary process transformed from biological into cultural From this point on the book follows the journey with detailed attention in order to learn how cultural evolution works The book is organized in three parts Part One commences with an exposition of a brief history of the evolutionary idea through time with a focus on a review of the science of general evolution and specifically social and societal evolution Next the book unfolds the evolutionary story of our species from the time when the first humanoids entered the evolutionary scene to our current era Part Two develops a systems view of evolution explores the ways and means of how evolution works characterizes evolutionary consciousness and develops the idea of conscious evolution Part Three builds upon the knowledge developed in the first two parts and sets forth the key conditions of conscious self guided evolution elaborating the core condition which is the acquisition of evolutionary competence through evolutionary learning The focus of this part is on an approach to the design of evolutionary guidance systems that our families neighborhoods communities organizations social and societal systems can use to design the future they aspire to attain The work is set aside from other statements in three important ways It provides 1 a comprehensive review of how evolution has worked with a focus on socio cultural evolution 2 an explanation of evolutionary consciousness and the conditions of engaging in conscious evolution and 3 most significantly it develops a detailed approach and a methodology to the design of evolutionary guidance systems

personal growth professional success or a renewed sense of purpose this book is your companion on the path to greatness The Time is Now The decision to embark on your mindset evolution journey starts with a simple but powerful choice the choice to invest in yourself The time is now and Mindset Evolution is your guidebook to unleash your full potential and create the life you've always imagined Don't wait another moment Order Mindset Evolution today and set out on the transformative journey that will redefine your life your goals and your future Your evolution begins here **The Nurture Effect** Anthony Biglan, 2015-03-01 For decades behavioral scientists have investigated the role our environment plays in shaping who we are Based on groundbreaking studies this book offers a fascinating look at the evolution of behavioral science the revolutionary ways it's changing the way we live and how nurturing environments can increase people's well-being in virtually every aspect of our society from early childhood education to corporate practices *Love and Hate* Irenaus Eibl-Eibesfeldt, 2017-07-05 The author argues that there are specific turning points in evolution Structures and behavioral patterns that evolved in the service of discrete functions sometimes allow for unforeseen new developments as a side effect In retrospect they have proven to be pre-adaptations and serve as raw material for natural selection to work upon Love and Hate was intended to complement Konrad Lorenz's book On Aggression by pointing out our motivations to provide nurturing and thus to counteract and correct the widespread but one-sided opinion that biologists always present nature as bloody in tooth and claw and intra-specific aggression as the prime mover of evolution This simplistic image is nonetheless still with us all the more regrettably because it hampers discussion across scholarly disciplines Eibl-Eibesfeldt argues that leaders in individualized groups are chosen for their pro-social abilities Those who comfort group members in distress who are able to intervene in quarrels and to protect group members who are attacked those who share those who in brief show abilities to nurture are chosen by the others as leaders rather than those who use their abilities in competitive ways Of course group leaders may need beyond their pro-social competence to be gifted as orators war leaders or healers Issues of love and hate are social in origin and hence social in consequence Life has emerged on this planet in a succession of new forms from the simplest algae to man the one being who reflects upon this creation who seeks to fashion it himself and who in the process may end by destroying it It would indeed be grotesque if the question of the meaning of life were to be solved in this way In language that is clear and accessible throughout arguing forcefully for the innate and preprogrammed dispositions of behavior in higher vertebrates including humans Eibl-Eibesfeldt steers a middle course in discussing the development of cultural and ethical Ethics Based on the Science of Evolution Robert Gordon, Robert Gordon Ph. D., 2003 Towards the end of 1943 and during all of 1944 the war on all Fronts was relentlessly and violently building to a dangerous and complex climax Although the Allies had massively invaded Europe in the early summer of 1944 we didn't see German capitulation for almost a year and even then only after the Russians renewed from their awful Battle of Stalingrad were rolling west into the very heartland of Germany taking Berlin block by block building by building With equal ferocity the Allies had rolled east

Eisenhower was poised fifty miles west at the Elbe River April 30th Hitler killed himself Two days later Berlin capitulated American losses in Europe totaled 170 000 The German end came fast Although the World celebrated Victory in Europe on May 5th Germans had been surrendering in big numbers through late April and early May By May 15th Allies had imprisoned five million German military personnel Some of the best news I heard was the surrender of 153 German submarines The foe in the Pacific would prove as implacable In contrast to the land war in Europe for us the war in the Pacific had always been a sea war with island invasions and battles taking place over great distances A few months after Pearl Harbor the author went to war in the Engineering Department of a shipyard in Los Angeles Harbor and enjoyed a brief but rigorous engineering apprenticeship earning an Industrial Deferment which required draft board renewal every six months In late summer of 1943 the U S Merchant Marine Academy accepted him but with a string attached Unlike the other three Federal academies this Academy required a six month tour of duty at sea preceded by ninety days of Basic Training wartime or peacetime The Dance of Nurture Penny Van Esterik, Richard A.
