The Priest and the Great King Lisbeth Fried,2004-06-30 Lisbeth S Fried s insightful study investigates the impact of Achaemenid rule on the political power of local priesthoods during the 6th 4th centuries B C E Scholars typically assume that as long as tribute was sent to Susa the capital of the Achaemenid Empire subject peoples remained autonomous Fried s work challenges this assumption She examines the inscriptions coins temple archives and literary texts from Babylon Egypt Asia Minor and Judah and concludes that there was no local autonomy The only people with power in the Empire were Persians and their appointees This was true for Judah as well The High Priest had no real power there was no theocracy The wars that periodically engulfed the Levant in the fourth century temporarily pulled the ruling governors and satraps away from Judah and during these times the Judean priesthood may have capitalized on the brief absence of Persian officials to mint coins but they achieved their longed for independence only much later under the Maccabees Liz added this explanatory note in an e mail to the Biblical Studies e mail list on December 2 2005 There s a confusion in reader s minds about my methodology which I d like to set straight if I may The book is a rewrite of my dissertation My dissertation was entitled The Rise to Power of the Judean Priesthood The Impact of the Achaemenid Empire I assumed at the outset that because the Achaemenid Empire was non directive and cared only that tribute would be sent regularly the priesthood was able to fill the resulting power vacuum and achieve secular power My goal was to chronicle the process In addition I thought to look at Eisenstadt s model which predicted the opposite result that local elites like priests could not rise to power in an imperial system Since there was no real data from Judah I looked at temple palace relations in Babylon Egypt and Asia Minor as well as Judah It was only during my research that I came to the conclusion that local priesthoods did not achieve secular power anywhere in the Achaemenid Empire and certainly not in Judah In fact their power diminished during those 200 years I also concluded not that Eisenstadt was correct but only that my data were insufficient to reject his model However my data were sufficient to reject the model of an Achaemenid Empire that was non directive as well as the model of Persian authorization of local norms Frei and Koch

Securing Eternity Reg Clark, 2019-04-30 The ancient Egyptian tomb evolved rapidly over a period of about 2 500 years from a simple backfilled pit to an enormous stone pyramid with complex security arrangements Much of this development was arguably driven by the ever present threat of tomb robbery which compelled tomb builders to introduce special architectural measures to prevent it However until now most scholarly Egyptological discussions of tomb security have tended to be brief and usually included only as part of a larger work the topic instead being the subject of lurid speculation and fantasy in novels the popular press and cinema In *Securing Eternity* Reg Clark traces in detail the development of the Egyptian royal and private tombs from the Predynastic Period to the early Fourth Dynasty In doing so he demonstrates that many of the familiar architectural elements of the Egyptian tomb that we take for granted today in fact originated from security features to protect the tomb rather than from monumental or religious considerations Richly illustrated with more than 150 photographs and tomb plans this unique study will be of interest to students specialists and general readers alike
