Theokas,2004-01-01 In recent decades suburban growth and the decline of industry have left cities throughout Europe and America searching for creative and effective ways to revitalize blighted areas and reclaim underused land In *Grounds for Review* Andrew Theokas examines one particularly exciting tool for reinvigorating urban areas the garden festival These festivals which began in post war Europe have been popular throughout the Continent for decades but are just beginning to gain currency in the United States A garden festival temporarily transforms a previously derelict area such as an abandoned factory lot into a festival of horticulture combining luxurious landscapes with exhibits and carnival rides Most garden festivals last about six months during which time they draw millions of visitors but the success of the fair itself is only the initial step in a detailed plan for urban improvement At the conclusion of the festival funds from its operation are used to transform the grounds once again this time with an eye toward the long term use of the land The enduring result of a successful garden festival is thus the transformation of derelict land into a community asset such as a new urban park or an affordable housing project Theokas considers here fifteen garden festivals

in Europe England and the United States in all their dimensions He examines the role they play in stimulating urban redevelopment their effects on the practice of landscape architecture and the contentious debates over their financing purposes and future prospects This highly illustrated volume will serve as a useful introduction to garden festivals for all those interested in urban planning horticulture and the future of cities Paperbound Books in Print ,1992 **Dickens**

Landscape in Children's Literature

Jane Carroll, 2012-08-06 This book provides a new critical methodology for the study of landscapes in children s literature Treating landscape as the integration of unchanging and irreducible physical elements or topoi Carroll identifies and analyses four kinds of space sacred spaces green spaces roadways and lapsed spaces that are the component elements of the physical environments of canonical British children s fantasy Using Susan Cooper s The Dark Is Rising Sequence as the test case for this methodology the book traces the development of the physical features and symbolic functions of landscape topoi from their earliest inception in medieval vernacular texts through to contemporary children s literature The identification and analysis of landscape topoi synthesizes recent theories about interstitial space together with earlier morphological and topoanalytical studies enabling the study of fictional landscapes in terms of their physical characteristics as well as in terms of their relationship with contemporary texts and historical precedents Ultimately by providing topoanalytical studies of other children s texts Carroll proposes topoanalysis as a rich critical method for the study and understanding of children s literature and indicates how the findings of this approach may be expanded upon In offering both transferable methodologies and detailed case studies this book outlines a new approach to literary landscapes as geographical places within socio historical contexts
