Remaking Cities (Routledge Revivals) Alison Ravetz, 2013-10-08 This book published in 1980 is an iconoclastic account of one of the pillars of the welfare state British town and country planning between 1945 and 1975 Always a fine balance between central control and market forces it was challenged by strains within and between the environmental professions and protest by people dispossessed or alienated by re shaped urban environments Remaking Cities critiques the export of western style planning to the developing world and reviews initiatives rooted in different understandings of growth appearing in those years Nearly forty years on many of the same issues beset us notably the depressingly familiar inner city problem despite countless reports funds and programmes But now our infrastructure and services once publicly owned are privatised and fragmented and local government progressively relegated The very core of planning development control is being pined in a struggle to regain the growth which led to our current crisis This gives fresh importance to the need for new modes of creating liveable sustainable environments emphasised in this important work **Shelter, Settlement &**

Wegelin, 2012-12-06 The research project of which the present study is the end result was initiated in late 1970 while I was affiliated with the Economisch Instituut voor de Bouwnijverheid Economic Institute for the Construction Industry Amsterdam the Netherlands This institution in association with the Urban Development Authority Kuala Lumpur Malaysia also supported fieldwork in Malaysia from early 1973 to spring 1975 This resulted in a report to the Malaysian government Wegelin 1975 which forms the basis of the present study Improvement and extension of the earlier

report to mould the study in its present shape has been made possible by the financial support of the Stichting Wetenschappelijk Onderwijs in Economische en Sociale Aspecten van Bouwproductie en Bouwnijverheid Foundation for University Education in Economic and Social Aspects of Construction Amsterdam the Netherlands The support of the above institutions is gratefully acknowledged The study owes much to the pioneering work on low income housing in developing countries by Charles Abrams and has further been stimulated particularly by the contributions of Leland S Bums and John F C Turner in this field The recent development of comprehensive cost benefit appraisal methods for industrial projects in developing countries by Professor I M D Little and J A Mirrlees OECD and A K Sen P Dasgupta and S A Marglin UNIDO provided a challenge to apply similar methods in the area of low income housing
