Archaeology he argues is above all a literary discipline **Grahame Clark** Brian Fagan,2018-07-03 The British archaeologist Grahame Clark was a seminal figure in European and world archaeology for more than half of the twentieth century but at the same time one whose reputation has been outshone by other more visible luminaries His works were never aimed at a wide general public nor did he become a television or radio personality Clark was above all a scholar whose contributions to world archaeology were enormous He was also convinced that the study of prehistory was important for all humanity and spent his career saying so For this he was awarded the prestigious Erasmus Prize in 1990 an award only rarely given to archaeologists This intellectual biography describes Clark s remarkable career and assesses his seminal contributions to archaeology Clark became interested in archaeology while at school studied the subject at Cambridge University and completed a groundbreaking doctorate on the Mesolithic cultures of Britain in 1931 He followed this study with a magisterial survey The Mesolithic Settlement of Northern Europe 1936 which established him as an international authority on the period At the same time he became interested in the interplay between changing ancient environment and ancient human societies In a series of excavations and important papers he developed environmental archaeology and the notion of ecological systems as a foundation of scientific multidisciplinary archaeology culminating in his world famous excavations at Starr Carr England in 1949 and his Prehistoric Europe The Economic Basis 1952 Clark became Disney Professor of Public Archaeology at Cambridge in 1952 and influenced an entire generation of undergraduates to become archaeologists in all parts of the world He was also the author of the first book on a global human prehistory World Prehistory 1961 People of the Earth ,1977 People of the Earth Brian M.
