Perceiving Acting And Knowing Toward An Ecological Psychology:

Perceiving, Acting and Knowing Robert Shaw, John Bransford, 2017-03-27 Originally published in 1977 the chapters in this volume derive from a conference on Perceiving Acting and Knowing held by the Center for Research in Human Learning at the University of Minnesota in 1973 The volume was intended to appeal not just to the specialist or the novice but to anyone sufficiently interested in psychology to have obtained a sense of its history at the time Through these essays the authors express a collective attitude that a careful scrutiny of the fundamental tenets of contemporary psychology may be needed In some essays specific faults in the foundations of an area are discussed and suggestions are made for remedying them In other essays the authors flirt with more radical solutions namely beginning from new foundations altogether Although the authors do not present a monolithic viewpoint a careful reading of all their essays under one cover reveals a glimpse of a new framework by which theory and research may be guided

Environmental Management Jonathan Woolley,2019-09-02 Common Sense in Environmental Management examines common sense not in theory but in practice Jonathan Woolley argues that common sense as a concept is rooted in English experiences of landscape and land management and examines it ethnographically unveiling common sense as key to understanding how British nature and public life are transforming in the present day Common sense encourages English people to tacitly assume that the management of land and other resources should organically converge on a consensus that yields self evident practical results Furthermore the English then tend to assume that their own position reflects that consensus Other stakeholders are not seen as having legitimate but distinct expertise and interests but are rather viewed as being stupid and or immoral for ignoring self evident pragmatic truths Compromise is therefore less likely and land management practices become entrenched and resistant to innovation and improvement Through a detailed ethnographic study of the Norfolk Broads this book explores how environmental policy and land management in rural areas could be more effective if a truly common sense was restored in the way we manage our shared environment Using academic and lay deployments of common sense as a route into the political economy of rural environments this book will be of great interest to scholars and students of socio cultural anthropology sociology human geography cultural studies social history and the environmental humanities Environment-Behavior Studies for Healthcare Design Suining Ding,2022-11-30 Environment

Varieties of Realism Margaret A. Hagen,1986-05-31 Varieties of Realism argues that it is not possible to represent the layout of objects and surfaces in space outside the dictates of formal visual geometry the geometry of natural perspective The book examines most of the world s coherent representational art styles both in terms of the geometry of their creation and in terms of their perceptual effects on the viewer A lucid exposition of modern geometrical principles and relations accessible to the nonmathematical reader is followed by an analysis of all known styles as variants of natural perspective as true varieties of realism Delineating the physical and mechanical constraints that determine the act of visual representation in painting and drawing the author traces the intimate relations among seemingly distant styles and considers the kind of perceptual information about the world each can carry Margaret Hagen is a perceptual psychologist with an ecological point of view Her rigorous but readable presentation of visual theory and research offers provocative new insights into the connections among vision geometry and art
