Rational-emotive Consultation in Applied Settings Raymond DiGiuseppe, Michael L. Bernard, 2013-06-17 For the past 20 years rational emotive therapy RET has been employed by consultants to help bring about changes not only in the way parents and teachers manage mental health and educational problems of school age children but also within organizations and families This is the first book devoted exclusively to the applications of RET in consultation For the first time international experts reveal the ways that RET can be applied at different levels of consultation client centered consultee centered systemic centered to help identify and overcome obstacles to effective consultation This volume reveals the missing link to effective consultation namely the emotional problems consultees bring with them to the practical problems with which they are faced Rational emotive consultation methods are ideally suited to help give consultees empowerment over their emotional problems In addition RET is an ideal adjunct to be included along with behavioral and organizational consultation methods already in use Written largely for school psychologists and consultants who work in educational and mental health settings this book demonstrates the variety of ways that RET can be used to conduct in service and professional personal development programs for teachers parents school administrators and other professional groups It is also a unique resource for practitioners working with the emotional behavioral and learning problems of school age children and looking for new and effective ways of incorporating caregivers in the treatment of these children

Using Rational-Emotive Therapy Effectively Michael E. Bernard, 2013-11-21 The initial conceptualization of this book was much more narrow than the final product that has emerged I started out believing that it would be enlightening to have a group of acknowledged rational emotive therapy RET expert practitioners with well established literary credentials write about how they approach the problem of modifying client irrationality Many RET practitioners of all levels of experience are on the one hand enamored of the economy the precision and the accuracy of psychological insight that RET theory offers but they are on the other hand equally frustrated by their own inability to persuade or otherwise change some of the clients they work with more quickly or even at all Indeed clients themselves frequently express the view that RET is illuminating yet they find themselves at the same time puzzled and perplexed by their inability to make the substantial changes that RET invites It became dearer as I discussed the project with many of the contributors that to practice RET effectively requires more than just innovative and persistent assessment and intervention techniques For example Russell Grieger expressed the view that more prerequisite work needs to be done on the value and philosophical systems of clients including personal responsibility and the philosophy of happiness before many clients can show significant shifts in their thinking Susan Walen raised the general issues of how effective RET can be in the treatment of biologically driven affective disorders
