Rationality And Dynamic Choice Foundational Explorations:

Rationality and Dynamic Choice Edward F. McClennen, 1990-05-25 In this major contribution to the theory of rational choice the author sets out the foundations of rational choice and then sketches a dynamic choice framework in which principles of ordering and independence follow from a number of apparently plausible conditions However there is potential conflict among these conditions and when they are weakened to avoid it the usual foundations of rational choice no longer prevail The thrust of the argument is to suggest that the theory of rational choice is less determinate than many suppose

Morality and Rational Choice J. Baron, 2012-12-06 Public controversies such as those about the distribution of goods between rich and poor trade and population policies allocation of medical resources and the tradeoff between environmental protection and economic efficiency often hinge on fundamental views about how we ought to make decisions that affect each other that is what principles we ought to follow Efforts to find an acceptable public philosophy a set of such principles on which people might agree have foundered because of disagreement among philosophers and others who are concerned with such issues One view which I shall develop and defend here holds that decisions that affect others should be made according to an overall evaluation of the consequences of each option This consequentialist view is opposed by a variety of alternatives but many of the alternatives have in common a basis in moral intuition To take a simple example consequentialism holds that other things equal if we have decided that it is better to let a terminally ill patient die than to prolong her agony by keeping her alive then we ought to kill her

Poetry, Politics, and the Body in Rimbaud Robert St. Clair, 2018-08-22 Bodies abound in Rimbaud's poetry in a way that is nearly unprecedented in the nineteenth century poetic canon lazy creative rule breaking bodies queer bodies marginalized and impoverished bodies revolting and revolutionary historical bodies The question that Poetry Politics and the Body seeks to answer is What does this corporeal density mean for reading Rimbaud What kind of sense are we to make of this omnipresence of the body in the Rimbaudian corpus from first to last from the earliest poems in verse celebrating the sheer simple delight of running away from wherever one is and stretching one's legs out under a table to the ultimate flight away from poetry itself In response this book argues that the body appears often literally as a kind of gap breach or aperture through which Rimbaud's poems enter into contact with history and a larger body of other texts Simply put the body is privileged lyrical material for Rimbaud a figure for human beings in their exposed finite creatureliness and in their unpredictable agency and interconnectedness Its presence in the early work allows us not only to contemplate what a strange sensuous thing it is to be embodied to be both singular and part of a collective it also allows the poet to diagnose and the reader to perceive a set of seemingly intractable real socio economic political and symbolic problems Rimbaud's bodies are in other words utopian bodies sites where the historical and the lyrical the ideal and the material do not so much cancel each other out as become caught up in one another

Scalable Uncertainty Management Serafín Moral, Olivier Pivert, Daniel Sánchez, Nicolás Marín, 2017-09-20 This book constitutes the refereed

proceedings of the 11th International Conference on Scalable Uncertainty Management SUM 2017 which was held in Granada Spain in October 2017 The 24 full and 6 short papers presented in this volume were carefully reviewed and selected from 35 submissions The book also contains 3 invited papers Managing uncertainty and inconsistency has been extensively explored in Artificial Intelligence over a number of years Now with the advent of massive amounts of data and knowledge from distributed heterogeneous and potentially conflicting sources there is interest in developing and applying formalisms for uncertainty and inconsistency in systems that need to better manage this data and knowledge The International Conference on Scalable Uncertainty SUM aims to provide a forum for researchers who are working on uncertainty management in different communities and with different uncertainty models to meet and exchange ideas

Preferring Justice Eric Cave, 2019-07-11 This manuscript is about the sense of justice that limits what individuals can do in pursuit of their ends and opens them to exploitation It shows how flawed agents choosing under partial information advance those of their ends having nothing to do with justice by maintaining such a disposition

Time in Action Carla Bagnoli, 2022-03-24 This book explores the role of time in rational agency and practical reasoning Agents are finite and often operate under severe time constraints Action takes time and unfolds in time While time is an ineliminable constituent of our experience of agency it is both a theoretical and a practical problem to explain whether and how time shapes rational agency and practical thought The essays in this book are divided into three parts Part I is devoted to the temporal structure of action and agency from metaphysical and metaethical perspectives Part II features essays about the temporal structure of rational deliberation from the perspective of action theory and theories of practical reasoning Part III includes essays about the temporal aspects of failures of rationality Taken together the essays in this book shed new light on our understanding of the temporality of agency that coheres with our subjective sense of finitude and explains rational agency both in time and over time Time in Action will be of interest to advanced students and researchers working on the philosophy of time metaphysics of action action theory practical reasoning ethical theory moral psychology and rational justification

Utility Theories: Measurements and Applications Ward Edwards, 2013-12-01 The Conference on Utility Theories Measurements and Applications met at the Inn at Pasatiempo in Santa Cruz California from June II to 15 1989 The all star cast of attendees are listed as authors in the Table of Contents of this book see p V except for Soo Hong Chew and Amos Tversky The purpose of the conference and of National Science Foundation Grant No SES 8823012 that supported it was to confront proponents of new generalized theories of utility with leading decision analysts committed to the implementation in practice of the more traditional theory that these new theories reject That traditional model is variously identified in this book as expected utility or subjectively expected utility maximization EU or SEU for short and variously attributed to von Neumann and Morgenstern or Savage I had feared that the conference might consist of an acrimonious debate between Olympian normative theorists uninterested in what people actually do and behavioral modelers obsessed with the cognitive illusions and uninterested in

helping people to make wise decisions I was entirely wrong The conferees in two dramatic straw votes at the opening session unanimously endorsed traditional SEU as the appropriate normative model and unanimously agreed that people do not act as that model requires These votes had a profound impact on my thinking detail about them and about that impact is located in Chapter 10

Knowledge, Beliefs and Economics R. Arena, 2006-01-01 The contributors to this book also suggest the need for a more integrated perspective on the meaning as well as the role of knowledge and beliefs in economics in the future Possible lines of future research such as the extension of the concept of rationality in economics or the focus on cognitive processes in economic action are discussed

Cognitive Economics Paul Bourguignon, Jean-Pierre Nadal, 2013-03-20 The social sciences study knowing subjects and their interactions A cognitive turn based on cognitive science has the potential to enrich these sciences considerably Cognitive economics belongs within this movement of the social sciences It aims to take into account the cognitive processes of individuals in economic theory both on the level of the agent and on the level of their dynamic interactions and the resulting collective phenomena This is an ambitious research programme that aims to link two levels of complexity the level of cognitive phenomena as studied and tested by cognitive science and the level of collective phenomena produced by the economic interactions between agents Such an objective requires cooperation not only between economists and cognitive scientists but also with mathematicians physicists and computer scientists in order to renew study and simulate models of dynamical systems involving economic agents and their cognitive mechanisms The hard core of classical economics is the General Equilibrium Theory based on the optimising rationality of the agent and on static concepts of equilibrium following a point of view systemised in the framework of Game Theory The agent is considered rational if everything takes place as if he was maximising a function representing his preferences his utility function

Value Incommensurability Henrik Andersson, Anders Herlitz, 2021-12-14 Incommensurability is the impossibility to determine how two options relate to each other in terms of conventional comparative relations This book features new research on incommensurability from philosophers who have shaped the field into what it is today including John Broome Ruth Chang and Wlodek Rabinowicz The book covers four aspects relating to incommensurability In the first part the contributors synthesize research on the competing views of how to best explain incommensurability Part II illustrates how incommensurability can help us deal with seemingly insurmountable problems in ethical theory and population ethics The contributors address the Repugnant Conclusion the Mere Addition Paradox and so called Spectrum Arguments The chapters in Part III outline and summarize problems caused by incommensurability for decision theory Finally Part IV tackles topics related to risk uncertainty and incommensurability Value Incommensurability Ethics Risk and Decision Making will be of interest to researchers and advanced students working in ethical theory decision theory action theory and philosophy of economics

Reasons and Intentions Bruno Verbeek, 2016-12-05 There are a number of problems in philosophy that seem to share a similar possible solution Why do promises and contracts bind Why ought citizens and judges obey the law and Can we

realize the gains to be made from cooperation All three problems as well as some others share a possible solution in the form of rational internal commitment Reasons and Intentions is a state of the art overview of the relevant positions on the possibility of such commitment including critical ones The introduction provides a survey of the central problem of the volume how the will can bind itself and still be instrumental in nature and the various positions which are further examined in the contributions Addressing the question of the relation between intentions and action the considerations which make an intention rational and how this translates into our conception of moral agency this book brings together specially commissioned essays by the leading scholars in the field

Minimal Morality Michael Moehler, 2018-03-09 Michael Moehler develops a novel multilevel social contract theory In contrast to existing theories in the liberal tradition it does not merely assume a restricted form of reasonable moral pluralism but is tailored to the conditions of deeply morally pluralistic societies which may be populated by liberal moral agents nonliberal moral agents and according to the traditional understanding of morality nonmoral agents alike Moehler draws on the history of the social contract tradition especially the work of Hobbes Hume Kant Rawls and Gauthier as well as on the work of some of the critics of this tradition such as Sen and Gaus Moehler's two level contractarian theory holds that morality in its best contractarian version for the conditions of deeply morally pluralistic societies entails Humean Hobbesian and Kantian moral features The theory defines the minimal behavioral restrictions that are necessary to ensure compared to violent conflict resolution mutually beneficial peaceful long term cooperation in deeply morally pluralistic societies The theory minimizes the problem of compliance in morally diverse societies by maximally respecting the interests of all members of society Despite its ideal nature the theory is in principle applicable to the real world and for the conditions described most promising for securing mutually beneficial peaceful long term cooperation in a world in which a fully just society due to moral diversity is unattainable If Rawls intention was to carry the traditional social contract argument to a higher level of abstraction then the two level contractarian theory brings it back down to earth

Decision Making Process Denis Bouyssou, Didier Dubois, Henri Prade, Marc Pirlot, 2013-05-10 This book provides an overview of the main methods and results in the formal study of the human decision making process as defined in a relatively wide sense A key aim of the approach contained here is to try to break down barriers between various disciplines

encompassed by this field including psychology economics and computer science All these approaches have contributed to progress in this very important and much studied topic in the past but none have proved sufficient so far to define a complete understanding of the highly complex processes and outcomes This book provides the reader with state of the art coverage of the field essentially forming a roadmap to the field of decision analysis The first part of the book is devoted to basic concepts and techniques for representing and solving decision problems ranging from operational research to artificial intelligence Later chapters provide an extensive overview of the decision making process under conditions of risk and uncertainty Finally there are chapters covering various approaches to multi criteria decision making Each chapter is written by experts in the topic concerned and contains an extensive bibliography for further reading and reference

Economic Analysis, Moral Philosophy and Public Policy Daniel M. Hausman, Michael S. McPherson, 2006-03-20 This 2006 book shows through accessible argument and numerous examples how understanding moral philosophy can improve economic analysis how moral philosophy can benefit from economists analytical tools and how economic analysis and moral philosophy together can inform public policy Part I explores rationality and its connections to morality It argues that in defending their model of rationality mainstream economists implicitly espouse contestable moral principles Part II concerns welfare utilitarianism and standard welfare economics while Part III considers important moral notions that are left out of standard welfare economics such as freedom rights equality and justice Part III also emphasizes the variety of moral considerations that are relevant to evaluating policies Part IV then introduces technical work in social choice theory and game theory that is guided by ethical concepts and relevant to moral theorizing Chapters include recommended readings and the book includes a glossary of relevant terms

Attention, Representation, and Human Performance Slim Masmoudi, David Yun Dai, Abdelmajid Naceur, 2012-05-04 This volume presents a rare occasion where scholars from Europe North Africa and North America share their research programs and findings revolving around an important theme integration Despite different research foci and methodologies there is a strong consensus that we need to understand a psychological phenomenon in all its complexity involving its neural psychological and social dimensions involving perception and conception and decision processes involving motivation emotion and cognition all in complex interaction This volume is intended to reach out to basic and applied psychological researchers cognitive and affective scientists learning scientists biologists sociologists neuropsychological researchers and philosophers who have an interest in an integrated understanding of the mind at work particularly pertaining to explanations of real life phenomena that have social and practical significance A distinct feature of this volume is that most research involved is heavily built on neuropsychological evidence while loyal to the experimental tradition with its focus on functional behavior in various situations and conditions that mimic or resemble real life The viability of this approach to doing cutting edge research that is relevant and applicable to many real life phenomena should also make this body of research useful for a wide range of human endeavor from religion education to industrial and

organizational psychology **The Foundations of Causal Decision Theory** James M. Joyce, 1999-04-13 The book also contains a major new discussion of what it means to suppose that some event occurs or that some proposition is true *The Social Contract of the Firm* Lorenzo Sacconi, 2012-12-06 In order to survive as a social institution a firm needs a constitutional social contract even though implicit among its stakeholders This social contract must exist if an institution is to be justified The book focuses on two main issues To find out the terms of the hypothetical agreement among the firm's stakeholders in an ex ante perspective and to understand the endogenous mechanism generating appropriate incentives that induce to comply with the social contract itself as seen in the ex post perspective Evaluation and Decision Models Denis Bouyssou, Thierry Marchant, Marc Pirlot, Patrice Perny, Alexis Tsoukias, P. Vincke, 2012-12-06 1 1 Motivations Deciding is a very complex and difficult task Some people even argue that our ability to make decisions in complex situations is the main feature that distinguishes us from animals it is also common to say that laughing is the main difference Nevertheless when the task is too complex or the interests at stake are too important it quite often happens that we do not know or we are not sure what to decide and in many instances we resort to a decision support technique an informal one we toss a coin we ask an oracle we visit an astrologer we consult an expert we think or a formal one Although informal decision support techniques can be of interest in this book we will focus on formal ones Among the latter we find some well known decision support techniques cost benefit analysis multiple criteria decision analysis decision trees But there are many other ones sometimes not presented as decision support techniques that help making decisions Let us cite but a few examples When the director of a school must decide whether a given student will pass or fail he usually asks each teacher to assess the merits of the student by means of a grade The director then sums the grades and compares the result to a threshold When a bank must decide whether a given client will obtain a credit or not a technique called credit scoring is often used
