Richard Müller, 2024-01-11 *The Emerging Contours of the Medium* explores a crucial aspect of media thinking, focusing particularly on the mediality of literature, a medium that remains today on the margins of the theoretical discussion of media. The book was written by a collective of authors based in the Institute of Czech Literature, Czech Academy of Sciences, Czech Republic. Even though interest in the technological and media aspects of literature has been slowly building momentum in the past several decades, from comparative perspectives to written culture to new media, the concept of the

medium has not informed this process and its systematic integration into literary studies has never been effectively carried out Nor has the specific mediality of literature been successfully integrated into the general concept of media lity in media science Contributors to this work provide both an explanation of and solution to this mutual blindness setting out from the question What are the conditions for elaborating a media theoretical framework in which to situate literature as a medium The Emerging Contours of the Medium available for the first time in English is divided into three parts which correlate to the three main research areas of the principles for a media theory of literature Part 1 develops a perspective of the pre history of media thinking grounding the principles of the genealogical integration Part 2 concentrates on and develops the related perspectives of media philosophy and media anthropology Part 3 s main focus is the way media as dispositifs interlinking the parameters of perception and communication provide the ground for making emergent media phenomena visible whether it be between media in their mutual synergy or discrepancies between media artefacts or between human and apparatus

Understanding Work and Employment Peter Ackers, Adrian Wilkinson, 2003 This book aims to analyze and criticize the contribution of industrial relations to social science understanding. It brings together leading scholars to reconsider the theoretical foundations of industrial relations and its potential contribution to the wider understanding of work and economic life to learn what it can gain from a stronger engagement with these surrounding disciplines and national traditions. The introduction provides a critical though broadly sympathetic outline of the development of the main stream industrial relations tradition. Part One recognizes the interdisciplinary character of industrial relations by concentrating on border encounters with the cognate academic disciplines of sociology, economics, management, history, psychology, law, politics, and geography. Of particular interest is how far industrial relations has contributed to social science understanding beyond its own narrow borders. Part Two combines a major critical analysis of the American school with three shorter discussions of Australia, Europe, and Japan. Part Three looks forward to the potential contribution of industrial relations to our understanding of work, employment, and society by identifying a variety of key dilemmas and debates which call for new interdisciplinary thinking. Finally, the book ends with a critical reassessment of the industrial relations tradition.

Postinternet Art and Its Afterlives Ian Rothwell, 2023-12-19 Focusing on the postinternet art of the 2010s, this volume explores the widespread impact of recent internet culture on the formal and conceptual concerns of contemporary art. The postinternet art movement is splintered and loosely defined both in terms of its form and its politics and has come under significant critique for this reason. This study will provide this definition, offering a much needed critical context for this period of artistic activity that has had and is still having a major impact on contemporary culture. The book presents a picture of what the art and culture made within and against the constraints of the online experience look, sound, and feel like. It includes works by Petra Cortright, Jon Rafman, Jordan Wolfson, DIS, Amalia Ulman, and Thomas Ruff and presents new analyses of case studies drawn from the online worlds of the 2010s, including vaporwave, anonymous image board culture, irony bros, and edgelords, viral extreme sports stunts, and GIFs. The book will be of interest to scholars working in art history, contemporary art, and digital culture.
