Falling for Therapy Anna Sands,2000-08-14 If the aim of psychotherapy is to alleviate suffering then the measure of its validity must be the extent to which it does or does not achieve that goal But who decides whether suffering has been alleviated or whether the well being of the client has been promoted On what basis are such judgements made The majority of literature on the effectiveness of therapy is written by therapists This book written by a client challenges the power of theory and ask questions which deserve to be aired and in so doing presents a powerful and articulate appeal for greater sensitivity a critical view and better practice

The Crucible of Experience Daniel Burston,2000-05-19 One of the great rebels of psychiatry R D Laing challenged prevailing models of madness and the nature and limits of psychiatric authority In this brief and lucid book Laing s widely praised biographer distills the essence of Laing s vision which was religious and philosophical as well as psychological The Crucible of Experience reveals Laing s philosophical debts to existentialism and phenomenology in his theories of madness and sanity family theory and family therapy Daniel Burston offers the first detailed account of Laing s practice as a therapist and of his relationships often contentious with his friends and sometime disciples Burston carefully differentiates between Laing and Laingians who were often clearer more confident and more simplistic than their teacher While he examines Laing s theories of madness Burston focuses most provocatively on Laing s views of sanity and normality and on his recognition toward the end of his life of the essential place of holiness in human experience In a powerful last chapter Burston shows that Laing foresaw the present commercialization of medicine and asked pointed questions about what the meaning of sanity and the future of psychotherapy in such a world could be In this as in other matters Laing s questions of a generation ago remain questions for our time

Emotions Kevin Sludds, 2009 In this study of emotions and moods the author discusses both analytic and continental traditions of philosophy He starts by examining critically the influential hybrid cognitive theory in particular William Lyons's causal evaluative theory describing its merits but also elucidating a number of fundamental defects that exist in this account He goes on to detail Martin Heidegger's description of mood in *Being and Time* as pre-cognitive and pre-moral defending it from those who attempt to attribute a cognitive dimension to it The book highlights the significance of connections or bonds in our affective lives at the ontic as well as ontological levels by examining three specific emotions grief guilt and objectless fear One of the study's principal achievements is the demonstration that there is much to be gained from both the analytic and continental traditions of philosophy in furthering our understanding of emotion and mood analysis In particular it shows how our understanding of guilt and objectless fear can be deepened when assessed in Heideggerian terms
