The Global Cybercrime Industry Nir Kshetri, 2010-06-25 The Internet's rapid diffusion and digitization of economic activities have led to the emergence of a new breed of criminals Economic political and social impacts impacts of these cyber criminals activities have received considerable attention in recent years Individuals businesses and governments rightfully worry about the security of their systems networks and IT infrastructures Looking at the patterns of cybercrimes it is apparent that many underlying assumptions about crimes are awed unrealistic and implausible to explain this new form of criminality The empirical records regarding crime patterns and strategies to avoid and fight crimes run counter to the functioning of the cyberworld The elds of hacking and cybercrime have also undergone political social and psychological metamorphosis The cybercrime industry is a comparatively young area of inquiry While there has been an agreement that the global cybercrime

industry is tremendously huge little is known about its exact size and structure Very few published studies have examined economic and institutional factors that influence strategies and behaviors of various actors associated with the cybercrime industry Theorists are also debating as to the best way to comprehend the actions of cyber criminals and hackers and the symbiotic relationships they have with various players **International Bibliography on Crime and Delinquency** ,1963
