significant and substantial correlations between reading fluency and overall reading achievement Despite the great potential for fluency to have a significant outcome on students reading achievement it continues to be not well understood by teachers school administrators and policy makers The chapters in this volume examine reading fluency from a variety of perspectives The initial chapter sketches the history of fluency as a literacy instruction component Following chapters examine recent studies and approaches to reading fluency followed by chapters that explore actual fluency instruction models and the impact of fluency instruction Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention Two articles on assessment one focused on word recognition and the other on prosody expand our understanding of fluency measurement Finally a study from Turkey explores the relationship of various reading competencies including fluency in an integrated model of reading Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction

Precursors of Functional Literacy Ludo Th Verhoeven, Carsten Elbro, Pieter

Reitsma, 2002-01-01 The purpose of this volume is to present recent research in the field of the acquisition of functional literacy and its precursors The volume aims to capture the state of the art in this rapidly expanding field An attempt is made to clarify the vague and often inconsistent definitions of functional literacy from the perspective of development Cognitive linguistic educational and social factors of literacy development are all taken into account The volume consists of three subsequent parts The first part goes into phonological precursors of literacy development In this part the focus is on the development of early language precursors of reading and writing The cultural foundations of these precursors are explored and their links with reading development are dealt with in detail Different psycholinguistic approaches are also proposed to explain the occurrence of literacy problems In the second part the scope is on the constraints of reading and writing efficiency at the word level and beyond The acquisition of reading and writing is seen as a result from the interaction between phonological orthographic and semantic processes A crosslinguistic perspective is taken on the role of writing system factors in the acquisition of literacy skills The final part deals with the role of social and educational factors in literacy acquisition Starting from a crosscultural perspective the central issue is how the attainment of functional literacy is dependent on sociocultural variation The predictors of more advanced levels of literacy development are considered including foreign language literacy and adult literacy
