Winston,Patricia Sapere,Carol M. Convertino,Rosemarie Seewagen,Christine Monikowski,2005-04-14 More the 1 46 million people in the United States have hearing losses in sufficient severity to be considered deaf another 21 million people have other hearing impairments For many deaf and hard of hearing individuals sign language and voice interpreting is essential to their participation in educational programs and their access to public and private services However there is less than half the number of interpreters needed to meet the demand interpreting quality is often variable and there is a considerable lack of knowledge of factors that contribute to successful interpreting Perhaps it is not surprising then that a study by the National Association of the Deaf NAD found that 70% of the deaf individuals are dissatisfied with interpreting quality Because recent legislation in the United States and elsewhere has mandated access to educational employment and other contexts for deaf individuals and others with hearing disabilities there is an increasing need for quality sign language interpreting It is in education however that the need is most pressing particularly because more than 75% of deaf students now attend regular schools rather than schools for the deaf where teachers and classmates are unable to sign for themselves In the more than 100 interpreter training programs in the U S alone there are a variety of educational models but little empirical information on how to evaluate them or determine their appropriateness in different interpreting and interpreter education covering what we know what we do not know and what we should know Several volumes have covered interpreting and interpreter education there are even some published dissertations that have included a single research study and a few books have attempted to offer methods for professional interpreters or interpreter educators with nods to existing research This is the first volume that synthesizes existing work and provides a coherent picture of the field as a whole including evaluation of the extent to which current practices are supported by validating research It will be the first comprehensive source suitable as both a reference book and a textbook for interpreter training programs and a variety of courses on bilingual education psycholinguistics and translation and cross linguistic studies Sign Language in Action Jemina Napier,Lorraine Leeson,2016-01-26 This book defines the notion of applied sign linguistics by drawing on data from projects that have explored sign language in action in various domains The book gives professionals working with sign languages signed language teachers and students research students and their supervisors authoritative access to current ideas and practice **The Routledge Handbook of Sign Language Translation and Interpreting** Christopher Stone,Robert Adam,Ronice Müller de Quadros,Christian Rathmann,2022-07-18 This Handbook provides the first comprehensive overview of sign language translation and interpretation from around the globe and looks ahead to future directions of research Divided into eight parts the book covers foundational skills the

Boudreault,2016-01-05 The time has come for a new in depth encyclopedic collection of articles defining the current state of Deaf Studies at an international level and using the critical and intersectional lens encompassing the field The emergence of Deaf Studies programs at colleges and universities and the broadened knowledge of social sciences including but not limited to Deaf History Deaf Culture Signed Languages Deaf Bilingual Education Deaf Art and more have served to expand the activities of research teaching analysis and curriculum development The field has experienced a major shift due to increasing awareness of Deaf Studies research since the mid 1960s The field has been further influenced by the Deaf community s movement resistance activism and politics worldwide as well as the impact of technological advances such as in communications with cell phones computers and other devices A major goal of this new encyclopedia is to shift focus away from the Medical Pathological Model that would view Deaf individuals as needing to be fixed in order to correct hearing and

speaking deficiencies for the sole purpose of assimilating into mainstream society By contrast The Deaf Studies Encyclopedia seeks to carve out a new and critical perspective on Deaf Studies with the focus that the Deaf are not a people with a disability to be treated and cured medically but rather are members of a distinct cultural group with a distinct and vibrant community and way of being

Sign Language Research, Uses and Practices Laurence Meurant, Aurélie Sinte, Mieke Van Herreweghe, Myriam Vermeerbergen, 2013-06-26 The uses and practices of sign languages are strongly related to scientific research on sign languages and vice versa Conversely sign linguistics cannot be separated from Deaf community practices including practices in education and interpretation Therefore the current volume brings together work on sign language interpreting the use of spoken and sign language with deaf children with cochlear implants and early language development in children exposed to both a spoken and sign language and reports on recent research on aspects of sign language structure It also includes papers addressing methodological issues in sign language research The book presents papers by more seasoned researchers and new kids on the block as well as papers in which the two collaborate The contributions will be of interest to all those interested in linguistics sociolinguistics cultural studies interpreting and education It will have particular relevance to those interested in sign linguistics sociolinguistics of deaf communities Deaf studies Deaf culture sign language interpretation sign language teaching and spoken signed bilingualism Given the scarcity of literature on Deaf studies the book will also appeal widely beyond the traditional academic milieu As a result it has relevance for those teaching and learning sign languages for professional and student interpreters and for teachers of the deaf

Kusters,Maartje De Meulder,Dai O'Brien,2017-04-14 What does it mean to engage in Deaf Studies and who gets to define the field What would a truly deaf led Deaf Studies research program look like What are the research practices of deaf scholars in Deaf Studies and how do they relate to deaf research participants and communities What innovations do deaf scholars deem necessary in the field of Deaf Studies In Innovations in Deaf Studies The Role of Deaf Scholars volume editors Annelies Kusters Maartje De Meulder and Dai O'Brien and their contributing authors tackle these questions and more Spurred by a gradual increase in the number of Deaf Studies scholars who are deaf and by new theoretical trends in Deaf Studies this book

creates an important space for contributions from deaf researchers to see what happens when they enter into the conversation. *Innovations in Deaf Studies* expertly foregrounds deaf ontologies defined as deaf ways of being and how the experience of being deaf is central not only to deaf research participants' own ontologies but also to the positionality and framework of the study as a whole. Further, this book demonstrates that the research and methodology built around those ontologies offer suggestions for new ways for the discipline to meet the challenges of the present, which includes productive and ongoing collaboration with hearing researchers. Providing fascinating perspective and insight, Kusters, De Meulder, O'Brien, and their contributors all focus on the underdeveloped strands within Deaf Studies, particularly on areas around deaf people's communities, ideologies, literature, religion, language practices, and political aspirations. **Handbook of Research**
