Psychology In Modules (Spiral) David G. Myers, 2009-09-28 Why Myers David Myers has become the world's best selling introductory psychology author by serving the needs of instructors and students so well Each Myers textbook offers an impeccable combination of up to date research well crafted pedagogy and effective media and supplements Most of all each Myers text demonstrates why this author's style works so well for students with his signature compassionate companionable voice and superb judgment about how to communicate the science of psychology and its human impact Why Modules This modules based version of Myers best selling full length text Psychology breaking down that book's 16 chapters into 59 short

modules is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose. Psychology In Modules David G. Myers, 2009-09-28

This version of the main text breaks down the chapters into shorter modules for more accessibility. The smaller chunks allow students to better grasp and explore psychological concepts. The modules also allow more flexibility in teaching as cross-references to other chapters have been replaced with brief explanations.

Routledge Handbook of Comparative Political Institutions Jennifer Gandhi, Rubén Ruiz-Rufino, 2015-04-10

The Routledge Handbook of Comparative Political Institutions HCPI is designed to serve as a comprehensive reference guide to our accumulated knowledge and the cutting edge of scholarship about political institutions in the comparative context. It differs from existing handbooks in that it focuses squarely on institutions but also discusses how they intersect with the study of mass behaviour and explain important outcomes drawing on the perspective of comparative politics. The Handbook is organized into three sections. The first section, consisting of six chapters, is organized around broad theoretical and empirical challenges affecting the study of institutions. It highlights the major issues that emerge among scholars defining, measuring, and analyzing institutions. The second section includes fifteen chapters, each of which handles a different substantive institution of importance in comparative politics. This section covers traditional topics such as electoral rules and federalism as well as less conventional but equally important areas including authoritarian institutions, labor market institutions, and the military. Each chapter not only provides a summary of our current state of knowledge on the topic but also advances claims that emphasise the research frontier on the topic and that should encourage greater investigation. The final section, encompassing seven chapters, examines the relationship between institutions and a variety of important outcomes such as political violence, economic performance, and voting behavior. The idea is to consider what features of the political, sociological, and economic world we understand better.

because of the scholarly attention to institutions Featuring contributions from leading researchers in the field from the US UK Europe and elsewhere this Handbook will be of great interest to all students and scholars of political institutions political behaviour and comparative politics Jennifer Gandhi is Associate Professor Department of Political Science Emory University Rub n Ruiz Rufino is Lecturer in International Politics Department of Political Economy King s College London **Discovery Science** Petra Kralj Novak,Tomislav Šmuc,Sašo Džeroski,2019-10-18 This book constitutes the proceedings of the 22nd International Conference on Discovery Science DS 2019 held in Split Croatia in October 2019 The 21 full and 19 short papers presented together with 3 abstracts of invited talks in this volume were carefully reviewed and selected from 63 submissions The scope of the conference includes the development and analysis of methods for discovering scientific knowledge coming from machine learning data mining intelligent data analysis big data analysis as well as their application in various scientific domains The papers are organized in the following topical sections Advanced Machine Learning Applications Data and Knowledge Representation Feature Importance Interpretable Machine Learning Networks Pattern Discovery and Time Series
