and illusions of security in the present social order The result is a lack of critical concern for the individual s and civilized societies survival to be assured into the future The theoretical address to this perceptual shift is the reason for the reprint of this book with two parts The second part addresses this issue It is entitled The Modern Perceptual Shift Preference for Emotional Responses as Reality It is important to understand that although this book appears to be a scholarly and difficult read it is essential to the well being of the individual as a parent and productive member of society In order to understand our world and our individual functioning a read and consideration of this book is vital To the mental health professional this treatment provides a balanced approach to utilizing therapy to assist clients in gaining control over their world

Michael R. LeGault, 2006-08-01 This isn't the time to Blink It's time to THINK before it's too late Outraged by the downward spiral of American intellect and culture Michael R LeGault offers the flip side of Malcolm Gladwell's bestselling phenomenon Blink which theorized that our best decision making is done on impulse without factual knowledge or critical analysis If bestselling books are advising us to not think LeGault argues it comes as no surprise that

sharp incisive reasoning has become a lost art in the daily life of Americans Somewhere along the line the Age of Reason morphed into the Age of Emotion this systemic erosion is costing time money jobs and lives in the twenty first century leading to less fulfillment and growing dysfunction LeGault provides a bold controversial and objective analysis of the causes and solutions for the erosion of growth and market share at many established American companies big and small which appear to have less chance of achieving the dynamic expansion of the past permissive parenting and low standards that have caused an academic crisis among our children body weights rise while grades plummet America s growing political polarization which is a result of our reluctance to think outside our comfort zone faulty planning and failure to act on information at all levels that has led to preventable disasters such as the Hurricane Katrina meltdown a culture of image and instant gratification fed by reality shows and computer games that has rendered curiosity of the mind and spirit all but obsolete stress aversion to taking risks and therapy that are replacing the traditional American can do mind set Far from perpetuating the stereotype of the complacent American LeGault s no holds barred analysis asks more of us than any other societal overview America can fulfill its greatest potential starting today and we need smart teachers smart health care workers smart sales representatives smart students smart mechanics and smart leaders to make it happen Now is the time to THINK because a mind truly is a terrible thing to waste
