Existentialism, 1948 **Action and Ethics in Aristotle and Hegel** Gary Pendlebury, 2017-07-05 Pendlebury alleges that abstraction and rationalization have had a strong and malign influence on normative moral philosophy in the 20th century Criticizing writers such as Hare Rawls and Scanlon for pursuing a conception of moral philosophy that bears little resemblance to the way in which human beings actually think and conduct themselves Pendlebury instead suggests a Virtue Ethics inspired by Hegel's and Aristotle's accounts of action as a corrective to this trend showing that moral activity is historically and socially based and must address the formed character of individual agents This trend which began with the responses by Locke Hume and Kant to Descartes Meditations rendered moral philosophy individualistic and psychologistic in contrast to Aristotle and Hegel's claim that man is essentially a social creature Pendlebury argues that this should be the starting point of any account and understanding of morality which roots the concept of will in the practical activity involved in being a member of an ethical community rather than an abstract metaphysical entity that is supposedly in the possession of individuals In providing a critique of modern moral philosophy from this perspective Pendlebury's line of enquiry lends much support to Virtue Ethics as exemplified in the work of Hursthouse and Slote while taking a more combative approach with those with whom he disputes In doing so he shows that serious considerations of continental philosophy highlights the richness of moral activity absent from analytical tradition which for so long has been bent on marginalizing it **The**

Sementelli, 2020-12-28 Knowledge does not happen in a vacuum yet scholars and other professionals tend to engage in management scholarship focused on their specific niche often without knowing if or how their work might relate to other research streams Further exacerbating things people within specific disciplines including management tend not to communicate regularly outside of their relatively homogeneous audiences If we were able to bridge communication among these groups scholars and practitioners we might be able to better understand one another in a way that is contextually informed by each other's experiences Sementelli argues that understanding concepts of power agency and experience can provide such tools to orient management theories and practices relative to one another Using critical management thought to frame a discussion of ontology and how knowledge emerges from it enables the development of an orienting sandbox that works both practically and intellectually Such a sandbox enables us not just to communicate one's organizational priorities but also reveal some underlying reasons for those priorities and areas of inquiry This monograph focuses on public administration in particular as a special case of critical management research This book also examines the complexity of experiences of being using Karl Jaspers as a basis The sandbox that emerges can be used as a way to organize and orient

management thought especially in the public sector It contributes both to administrative thought and applied inquiry into philosophy and will be of interest to researchers academics and students in the fields of critical management studies organizational studies and public administration **The Blackwell Companion to Philosophy** Nicholas Bunnin, Eric Tsui-James, 2003 An introduction to philosophy looks at key issues figures and movements in the field
