**Dictionary of Twentieth-Century British Philosophers** Stuart Brown,2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who

spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture

Theories of Violent Conflict Jolle Demmers, 2012-07-26 This textbook introduces students of violent conflict to a variety of prominent theoretical approaches and examines the ontological stances and epistemological traditions underlying these approaches Theories of Violent Conflict takes the centrality of the group as an actor in contemporary conflict as a point of departure leaving us with three main questions What makes a group Why and how does a group resort to violence Why and how do or don't they stop The book examines and compares the ways by which these questions are addressed from a number of perspectives constructivism social identity theory structuralism political economy human needs theory relative deprivation theory collective action theory and rational choice theory The final chapter aims to synthesise structure and agency based theories by proposing a critical discourse analysis of violent conflict This book will be essential reading for students of war and conflict studies peace studies conflict analysis and conflict resolution and ethnic conflict as well as security studies and IR in general

*Rousseau* Timothy O'Hagan, 2003-09-02 Timothy O'Hagan investigates Jean Jacques Rousseau's writings concerning the formation of humanity of the individual and of the citizen in his three master works the Discourse on the Origin of Inequality among Men Emile and the Social Contract He explores Rousseau's reflections on the sexes language and religion O'Hagan gives Rousseau's arguments a close and sympathetic reading He writes as a philosopher not a historian yet he never loses sight of the cultural context of Rousseau's work

*Decision Theory and Rationality* José Luis Bermúdez, 2009-02-19 The concept of rationality is a common thread through the human and social sciences from political science to philosophy from economics to sociology and from management science to decision analysis But what counts as rational action and rational behavior Jos Luis Bermúdez explores decision theory as a theory of rationality Decision theory is the mathematical theory of choice and for many social scientists it makes the concept of rationality mathematically tractable and scientifically legitimate Yet rationality is a concept with several dimensions and the theory of rationality has different roles to play It plays an action guiding role prescribing what counts as a rational solution of a given decision problem It plays a normative role giving us the tools to pass judgment not just on how a decision problem was solved but also on how it was set up in the first place And it plays a predictive explanatory role telling us how rational agents will behave or why they did what they did This controversial but accessible book shows that decision theory cannot play all of these roles simultaneously And yet it argues no theory of rationality can

play one role without playing the other two The conclusion is that there is no hope of taking decision theory as a theory of rationality

**A Non-Instrumentalist Approach to Collective Intentionality, Practical Reason, and the Self** Juliette Gloor, 2014-02-19 Taking into account the relevant and mostly contemporary Anglo American debates concerning collective intentionality the author examines what it means to share reasons and other intentional states such as thoughts and emotions The guiding question of the dissertation is in what way and to what extent morality and therefore self consciousness can be understood as conditions of possibility for the sharing of mental states especially reasons The dissertation is a contribution mainly to fields of research in practical philosophy normative ethics and moral psychology and in social philosophy collective intentionality analysis and rational choice theory

**International Relations in a Constructed World** Vendulka Kubalkova, 2015-03-04 Explores the application of constructivist theory to international relations The text examines the relevance of constructivism for empirical research focusing on some of the key issues of contemporary international politics ethnic and national identity gender and political economy

**What Are the Humanities For?** Willem B. Drees, 2021-04-29 What are the humanities for The question has perhaps never seemed more urgent While student numbers have grown in higher education universities and colleges increasingly have encouraged students to opt for courses in STEM science technology engineering and mathematics or take programs in applied subjects like business and management When tertiary learning has taken such a notably utilitarian turn the humanities are judged to have lost their centrality Willem B Drees has no wish nostalgically to prioritize the humanities so as to retrieve some lost high culture But he does urge us to adopt a clearer conception of the humanities as more than just practical vehicles for profit or education He argues that these disciplines while serving society are also intrinsic to our humanity His bold ideas about how to think with greater humanistic coherence mark this topical book out as unmissable reading for all those involved in academe especially those in higher educational policy or leadership positions

**The Undermining of Beliefs in the Autonomy and Rationality of Consumers** John O'Shaughnessy, Nicholas O'Shaughnessy, 2007-11-08 This book examines modern consumption focusing on concepts of autonomy and rationality The authors adopt a moderating perspective reviewing and critiquing attacks on these concepts in order to work towards a more nuanced view of the consumer

**Political Authority and Obligation in Aristotle** Andres Rosler, 2005-03-03 to follow

**Truth and Consequences** Reed Way Dasenbrock, 2010-11-01 Contemporary literary theory takes truth and meaning to be dependent on shared conventions in a community of discourse and views authors intentions as irrelevant to interpretation This view argues Reed Way Dasenbrock owes much to Anglo American analytic philosophy as developed in the 1950s and 1960s by such thinkers as Austin and Kuhn but it ignores more recent work by philosophers like Davidson and Putnam who have mounted a counterattack on this earlier conventionalism This book draws on current analytic philosophy to resuscitate the notion of objective truth and intentionalist models of meaning and interpretation thereby moving beyond the antifoundationalism of postmodern theory It addresses the work of

Rorty and Fish as representative of literary conventionalism discusses the futility of Derrida's anti-intentionalism and shows how poststructuralist thinkers like Althusser and Foucault have contributed to the new thematics of race class gender and sexual orientation that dominates literary theory today Examining the counter arguments of conventionalists to have their theory judged by its consequences Dasenbrock shows how damaging this antiobjectivism and anti-intentionalism have been for literary studies      Encyclopedia of Philosophy and the Social Sciences Byron Kaldis,2013-04-02 The entries in this encyclopedia give readers an opportunity to explore interconnections clarify commonalities as well as differences or comparative contrasts discover new fields or ideas of intellectual interest explore adjacent conceptual zones that may be found to further expand their own disciplinary domains and also understand better their own academic areas of expertise and the historical provenance of each p xxxi      **Reasons for Action and the Law** M.C. Redondo,2013-06-29 A focus on reasons for action and practical reason is the perspective chosen by many contemporary legal philosophers for the analysis of some central questions of their discipline This book offers a critical evaluation of that approach by carefully examining the empirical logical and normative problems hidden behind the concepts of reason for action and practical reasoning Unlike most other works in this field it is a meta-theoretical study which analyses and compares how different theories use the notion of reason in their reconstruction of problems concerning issues such as normativity the acceptance of norms or the justification of judicial decisions This book is directed primarily to scholars specializing in legal theory and concerned with the contribution practical philosophy can make to it but it also contains important arguments and insights for all those interested in the controversy between legal positivists and their critics in the theory of human action or in reason-based practical theories in general
