Rediscovery Ancient Pathways New Directions A Guidebook To Outdoor Education:

The Changing World of Outdoor Learning in Europe Peter Becker, Barbara Humberstone, Chris Loynes, Jochem Schirp, 2018-06-12 The Changing World of Outdoor Learning in Europe sets out to provide a comprehensive analysis of the economical and political changes that have occurred in European outdoor culture in the preceding two decades from a diverse range of perspectives including institutional theoretical national and educational views The book looks at how outdoor education has been transformed into an increasingly global field where established and influenced practices have been introduced into modernising and democratising nations With contributions from the members of the board of the European Institute of Outdoor Adventure Education and Experiential Learning and representatives of the networks that stand behind it this unique book provides thorough factual analyses and examinations of outdoor learning that have never been presented before The book contains contributions from across Europe with authors from the UK Germany Finland Sweden Slovenia Poland Norway and the Czech Republic Chapters within the volume by non European authors provide another perspective on the European story in a wider context As a whole the book will stimulate the ongoing debate about the nature function and organisation of outdoor education around the globe The Changing World of Outdoor Learning in Europe will be of great interest to academics researchers and postgraduate students in the fields of outdoor education leadership and recreation and outdoor sport environmental and leisure studies It should also be essential reading for those involved in outdoor organisations in Europe and worldwide

Rediscovery Thom Henley, 1996 For over 25 years the Rediscovery program has drawn from the timeless wisdom of native American elders to help teach youth native American and otherwise to respect the earth and each other Today dozens of Rediscovery programs have been developed around the world helping indigenous youth to rediscover their heritage and allowing others the opportunity to learn important lessons about balance and harmony with our environment This deeply respectful book provides more than 130 activities which schools and youth camps are able to use when they gather to reacquaint themselves with their place in nature Author Thom Henley is a founder of the Rediscovery program and a tireless campaigner for the preservation of wilderness areas and traditional lands He has traveled to more than 70 countries to live with and learn from indigenous peoples He has lectured in 15 countries and has received numerous international and national conservation and human rights awards among them the prestigious Sol Feinstone Award from the State University of New York

Routledge International Handbook of Outdoor Studies Barbara Humberstone, Heather Prince, Karla A. Henderson, 2015-11-19 The outdoors is a physical and ideological space in which people engage with their environment but it is also an important vehicle for learning and for leisure The Routledge Handbook of Outdoor Studies is the first book to attempt to define and survey the multi disciplinary set of approaches that constitute the broad field of outdoor studies including outdoor recreation outdoor education adventure education environmental studies physical culture studies and leisure studies It reflects upon the often haphazard development of outdoor studies as a

discipline critically assesses current knowledge in outdoor studies and identifies further opportunities for future research in this area. With a broader sweep than any other book yet published on the topic, this handbook traces the philosophical and conceptual contours of the discipline as well as exploring key contemporary topics and debates and identifying important issues in education and professional practice. It examines the cultural, social and political contexts in which people experience the outdoors, including perspectives on outdoor studies from a wide range of countries, providing the perfect foundation for any student, researcher, educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us.

The Culture of Nature Alexander Wilson, 1991. In this celebrated work, Alexander Wilson examines environments built over the past fifty years as humans have continued to discover, exploit, protect, restore and sometimes re-enchant a natural world in convulsion. Extensively illustrated.

Connecting with Nature Robert Cyril Stebbins, 2012. One of my earliest memories is of a warm day, a field with many grasshoppers, a shallow creek with cold water and the joy of a day in the hills with my parents. My dad had gone fishing and I was free to wander about nearby. It was summer in the Gray Pines foothills of the Sierra Nevada near Chico, California, where I was born. Along the creek, I found a turtle. I had hoped someday to have one as a pet. I ran with the wondrous creature cradled in my hands to show my mom. I was enthralled with its bright eyes, the feel of its claws and its cold body as it struggled to free itself from my grasp. So began a lifetime of connecting with nature. And so begins this amazing book, an irresistible story of how one child fell in love with nature and your students can too. Taking what he calls a nature-centred worldview, author Robert Stebbins blends activities, examples and stories with his perspectives on the importance of dealing objectively yet compassionately with social and environmental problems. As thought-provoking as it is charming, *Connecting With Nature* includes discussions of ecological illiteracy and the impediments that keep people young and old from bonding with nature, recommendations for establishing a nature-centred educational program and encouraging interest in nature at home, advice on doing accurate observations and field reports and understanding natural selection and a captivating array of activities to capture the attention of students of all ages: imitating animal sounds, quieting lizards, tracking animals, photographing birds and playing hide and seek with owl calls. Even a quick glance through *Connecting With Nature* will make you wish you could give your students the joy of a day in the hills with the author. Failing that, you can use his book to instill a love of nature in your students and rekindle it in yourself.
