Reflection High Energy Electron Diffraction:

Reflection High-Energy Electron Diffraction Ayahiko Ichimiya, Philip I. Cohen, 2004-12-13 Publisher Description

Applied RHEED Wolfgang Braun, 1999-04-16 The book describes RHEED reflection high energy electron diffraction used as a tool for crystal growth New methods using RHEED to characterize surfaces and interfaces during crystal growth by MBE molecular beam epitaxy are presented Special emphasis is put on RHEED intensity oscillations segregation phenomena electron energy loss spectroscopy and RHEED with rotating substrates

Reflection High-Energy Electron Diffraction and Reflection Electron Imaging of Surfaces P.K. Larsen, P.J. Dobson, 2012-12-06 This volume contains the papers presented at the NATO Advanced Research Workshop in Reflection High Energy Electron Diffraction and Reflection Electron Imaging of Surfaces held at the Koningshof conference center Veldhoven the Netherlands June 15 19 1987 The main topics of the workshop Reflection High Energy Electron Diffraction RHEED and Reflection Electron Microscopy REM have a common basis in the diffraction processes which high energy electrons undergo when they interact with solid surfaces at grazing angles However while REM is a new technique developed on the basis of recent advances in transmission electron microscopy RHEED is an old method in surface crystallography going back to the discovery of electron diffraction in 1927 by Davisson and Germer Until the development of ultra high vacuum techniques in the 1960 s made instruments using slow electrons more accessible RHEED was the dominating electron diffraction technique Since then and until recently the method of Low Energy Electron Diffraction LEED largely surpassed RHEED in popularity in surface studies The two methods are closely related of course each with its own specific advantages The grazing angle geometry of RHEED has now become a very useful feature because this makes it ideally suited for combination with the thin growth technique of Molecular Beam Epitaxy MBE This combination allows in situ studies of freshly grown and even growing surfaces opening up new areas of research of both fundamental and technological importance

Theory of Rheed (Reflection High Energy Electron Diffraction). N. Masud, 1976 *Reflection High Energy Electron Diffraction Studies of Interface Formation* Paul Pukite, 1988

High Energy Electron Diffraction and Microscopy L.-M. Peng, S. L. Dudarev, M. J. Whelan, 2004 This book is an in depth treatment of the theoretical background relevant to an understanding of materials that can be obtained by using high energy electron diffraction and microscopy

Applied Rheed Wolfgang Braun, 2014-01-15 In Situ Real-Time Characterization of Thin Films Orlando Auciello, Alan R. Krauss, 2001 An in depth look at the state of the art of in situ real time monitoring and analysis of thin films With thin film deposition becoming increasingly critical in the production of advanced electronic and optical devices scientists and engineers working in this area are looking for in situ real time structure specific analytical tools for characterizing phenomena occurring at surfaces and interfaces during thin film growth This volume brings together contributed chapters from experts in the field covering proven methods for in situ real time analysis of technologically important materials such as multicomponent oxides in different environments Background

information and extensive references to the current literature are also provided Readers will gain a thorough understanding of the growth processes and become acquainted with both emerging and more established methods that can be adapted for in situ characterization Methods and their most useful applications include Low energy time of flight ion scattering and direct recoil spectroscopy TOF ISRAS for studying multicomponent oxide film growth processes Reflection high energy electron diffraction RHEED for determining the nature of chemical reactions at film surfaces Spectrometric ellipsometry SE for use in the analysis of semiconductors and other multicomponent materials Reflectance spectroscopy and transmission electron microscopy for monitoring epitaxial growth processes X ray fluorescence spectroscopy for studying surface and interface structures And other cost effective techniques for industrial application *The Study of Surfaces by Dynamical Reflection High-energy Electron Diffraction* Tiecheng Zhao,1990 The Use of Reflection High-energy Electron Diffraction for Molecular Beam Epitaxy Jay Samuel Resh,1989
