Reflections on Human Inquiry: Science, Philosophy and Common Life

Nilanjan Bhowmick

We all wonder about the relations between science, philosophy and common life, but the topics present such a wide variety of unconnected thoughts that we despair to have any clear insights. Nilanjanhou Mukherji's compelling book, *Reflections on Human Inquiry*, brings forth the relations between science, philosophy and common life in ways that are scientifically well-informed, philosophically rich and seamlessly connected to each other. The book has twelve chapters, with the initial chapters (1 to 5) dealing with what is described as the Galilean style and skepticism thereof and the later chapters dealing with the various problems that philosophers deal with regarding the nature of knowledge, belief, consciousness. Then two chapters (11 and 12, respectively) offer reflections on the relation between literature and philosophy and what kind of education is right for our species.

The book has many fundamental insights. To mention just a few: an intelligible space is made for skepticism, some light is thrown on the way the history of philosophy and science are intertwined, remarks are made on the nature and history of Indian philosophy which are surprising and suggestive and a distinction is drawn between the order of things which humans inquire into and the needs of humans.
