## **Reflexive Language Reported Speech And Metapragmatics:**

**Reflexive Language** John A. Lucy, 1993-03-04 These innovative essays represent a critique of those researchers in the humanities and social sciences who fail to take language seriously

**Metapragmatics in Use** Wolfram Bublitz, Axel Hübler, 2007 This collection of papers fills a gap in current research on both metapragmatics and pragmatics in that it combines data based pragmatic analysis with metapragmatic theory and focuses on the ways in which metadiscourse is actually used The 12 contributions investigate speech acts and verbal as well as non verbal expressions which highlight meta linguistic aspects of ongoing discourse and thus provoke a deviation from the latter's original direction and purpose All case studies discuss ways and means which interactants employ to resolve diverging pragmatic expectations in communication The papers analyze authentic examples from English and other languages and cultures including Thai Chinese and Japanese and center around three principal domains of communication ordinary everyday interaction interaction in educational contexts and in specialized discourse The introductory chapter locates the various contributions within a systematically broader theoretical framework The wide scope of the collection its empirical orientation and the reader friendly form of presentation should appeal to anyone interested in pragmatics whether scholar or student

**The Reflexivity of Language and Linguistic Inquiry** Dorthe Duncker, 2018-11-09 This book explores the reflexivity of language both from the perspective of the lay speaker and the linguistic analyst Linguistic inquiry is conditional upon linguistic reflexivity but so is language Without linguistic reflexivity we would not be able to make sense of everyday linguistic communication and the idea of a language would not be conceivable Not even fundamental notions such as words or meaning would exist Linguistic reflexivity is a feature of the communication process and it essentially depends on situated participants and time It is a defining characteristic of the human language but despite its obvious importance it is not very well understood theoretically and it is strangely under researched empirically Throughout history and in modern linguistics it has mostly either been taken for granted misconstrued or ignored Only integrational linguistics fully recognizes its specifically linguistic implications However integrational linguistics does not provide the necessary methodological basis for investigating linguistic phenomena empirically This catch 22 situation means that the goal of the book is twofold one part is to explore the reflexivity of language theoretically and the other part is to propose an applied integrational linguistics and to implement this proposal in practice

*Doing Pragmatics* Peter Grundy, 2013-11-26 *Doing Pragmatics* achieved success through its unparalleled capacity to render pragmatics truly accessible to students Embracing the comprehensive and engaging style which characterised the previous editions the third edition is fully revised and expanded Grundy consolidates the strengths of the original version reinforcing its unique combination of theory and practice with new theory exercises and up to date real data and examples New chapters include pragmatic inference and language evolution and intercultural pragmatics *Doing Pragmatics* is designed for pragmatics courses both at an introductory and a more advanced level It extends beyond theory to promote an

applied understanding of empirical data and to provide students with the opportunity to do pragmatics themselves providing the ideal foundation for all those studying linguistics and ELT

**Indirect Reports and Pragmatics** Alessandro Capone, Ferenc Kiefer, Franco Lo Piparo, 2015-12-01 This volume offers the reader a singular overview of current thinking on indirect reports The contributors are eminent researchers from the fields of philosophy of language theoretical linguistics and communication theory who answer questions on this important issue This exciting area of controversy has until now mostly been treated from the viewpoint of philosophy This volume adds the views from semantics conversation analysis and sociolinguistics Authors address matters such as the issue of semantic minimalism vs radical contextualism the attribution of responsibility for the modes of presentation associated with Noun Phrases and how to distinguish the indirect reporter's responsibility from the original speaker's responsibility They also explore the connection between indirect reporting and direct quoting Clearly indirect reporting has some bearing on the semantics pragmatics debate however there is much controversy on what is said whether this is a minimal semantic logical form enriched by saturating pronominals or a much richer and fully contextualized logical form This issue will be discussed from several angles Many of the authors are contextualists and the discussion brings out the need to take context into account when one deals with indirect reports both the context of the original utterance and the context of the report It is interesting to see how rich cues and clues can radically transform the reported message assigning illocutionary force and how they can be mobilized to distinguish several voices in the utterance Decoupling the voice of the reporting speaker from that of the reported speaker on the basis of rich contextual clues is an important issue that pragmatic theory has to tackle Articles on the issue of slurs will bring new light to the issue of decoupling responsibility in indirect reporting while others are theoretically oriented and deal with deep problems in philosophy and epistemology

**The Cambridge Handbook of the Philosophy of Language** Piotr Stalmaszczyk, 2021-12-02 A comprehensive guide to contemporary investigations into the relationship between language philosophy and linguistics

Perspective and Perspectivation in Discourse Carl Friedrich Graumann, Werner Kallmeyer, 2002-01-01 Perspective and viewpoint are widely used in everyday talk as well as in the specialist languages of the social cognitive and literary sciences Taken from the field of visual perception and representation these concepts have acquired a general meaning and significance as characteristics of human cognitive processing Since however this field is shared by an increasing body of disciplines perspective terms have also acquired specific and technical meanings A striking example is the newly introduced use of perspectivation in discourse analysis This volume on perspective and perspectivation the first of its kind will help to fill the gap between the common understanding of perspective and the specifics of its structure and dynamics as they have been elaborated in the human sciences mainly in psychology and linguistics The focus is on the structure of perspectivity in cognition and language and the dynamics of setting and taking perspectives in social interaction and in the construction and understanding of texts Both topics are presented here in an interdisciplinary way by a

group of linguists and psychologists      New Frontiers in Pragmalinguistic Studies Alessandro Capone, Roberto Graci, Pietro Perconti, 2025-01-29 This book contains a comprehensive view of pragmalinguistic studies and their recent ramifications boasting some of the most advanced recent research in pragmatics Organised into three sections pragmalinguistics social pragmatics and cognitive inferential pragmatics respectively the chapters enable an understanding of the possible applications of linguistic and philosophical theories in practical fields Covering topics such as polysemy across languages and lexical externalism the role of literal meaning in the construction of metaphorical meaning the pragmatics of truth the roles of reflexivity in meaning negotiation argumentation and discourse the pragmatics of taboo linguistic and cognitive aspects of formation of implicates and reflections on neuropragmatics and clinical pragmatics in Autism Spectrum Disorder and Schizophrenia to name but a few exciting areas of exploration this book is of interest to scholars and postgraduate students in the fields of semantics pragmatics and philosophy of language cognitive science and other areas of linguistics
