Right To Die Dax Cowart Case:

A Right to Die? Robert J. Cavalier, Preston K. Covey, David Andersen, 1996 **A right to die? : the Dax Cowart case ; [an ethical case study on CD-ROM]** David Andersen, Robert Cavalier, Preston K. Covey, 1996

The fascinating and moving case of Dax Cowart is one of the best known and most significant in applied ethics highlighting the ethical and medical dilemmas over an individual's right to die. As a young man, Dax Cowart was seriously injured and left with greatly reduced quality of life as a result of a car accident in Texas. Dax's struggle to die and the arguments surrounding the decisions of those involved made him a cause célèbre in the Right to Die movement. This ground-breaking CD-ROM developed in association with Carnegie Mellon University presents this important case in detail. The user sees and hears Dax himself and those surrounding him and is forced to participate in the difficult decisions being made. The user is asked to make brief statements justifying these decisions which can be reviewed at the end of the session. By participating in this genuinely interactive process, students develop practice and defend their ethical analysis and decision making using a real world case study. Bringing together reference material, pedagogical text, video and sound, The Right to Die on CD-ROM is a major resource across several academic disciplines including philosophy, medical ethics and law. Professional practitioners will also find this CD-ROM essential for reviewing and honing their analytical skills and libraries, societies, pressure groups and other concerned institutions will require copies for reference use. The software allows the user to install on either a Macintosh or Windows machine. Save and print out their own notes and statements. Review the decisions and statements made during a session. Access video clips without running through the whole program.

Contents

- 1 Programme Introduction Introduces the programme and introduces The Basic Question. In the latter, the user is asked to take on an initial view of Dax Cowart's request to die based on a summary of the case.
- 2 Guided Inquiries The user is guided through the case and its context, reading evidence, listening to the arguments put forward and watching video footage. The user is asked to make ethical decisions and the evidence and text presented subsequently changes appropriately, demonstrating the full impact of decisions taken. The user can at any time seek help on the philosophical thinking involved behind the decision at hand using the commentary button. The last section of the Guided Inquiries, Final Position, leaves the user to make the final judgement. The programme finishes with an audio-visual segment that once again challenges the user to reflect on their position.
- 3 The Archives This section allows a review of the case material including audio-visual elements independently from the case narrative. Additional information regarding the case chronology and other famous right to die cases are included. Available in a basic single user version or a multi user version. The multi user version allows the purchase of multiple copies at a substantial discount on the single user price for use in the classroom and project work in libraries and computing centres.

Teacher's Guide Provided with the multi user version, this book not only guides the instructor through the programme but also suggests possible uses of the CD-ROM in the classroom with specific lesson plans and bibliographies. For more information on this title, including sample

Communication and Bioethics at the End of Life Lori A. Roscoe,David P. Schenck,2017-12-07 This casebook provides a set of cases that reveal the current complexity of medical decision making ethical reasoning and communication at the end of life for hospitalized patients and those who care for and about them End of life issues are a controversial part of medical practice and of everyday life Working through these cases illuminates both

the practical and philosophical challenges presented by the moral problems that surface in contemporary end of life care. Each case involved real people with varying goals and constraints who tried to make the best decisions possible under demanding conditions. Though there were no easy solutions nor ones that satisfied all stakeholders, there are important lessons to be learned about the ways end of life care can continue to improve. This advanced casebook is a must read for medical and nursing students, students in the allied health professions, health communication scholars, bioethicists, those studying hospital and public administration as well as for practicing physicians and educators.

Euthanasia Josef Kuře, 2011-09-15. No one really wants to die or do they? From classical times to our post modern era of medical high tech societies have struggled with the thorny issue of euthanasia and what it entails. Who shall be entitled to a good death and in what form shall it arrive? This book provides the reader with insight and enlightenment on the medical, philosophical, social, cultural, and existential aspects of good death amid our digitized, individualized, and ageing society hampered by rising health care costs but unchained from one standardized level of care.

Everybody Wants to Go to Heaven but Nobody Wants to Die: Bioethics and the Transformation of Health Care in America Amy Gutmann, Jonathan D. Moreno, 2019-08-27. NOW FEATURING A NEW AFTERWORD PANDEMIC ETHICS. From two eminent scholars comes a provocative examination of bioethics and our culture's obsession with having it all without paying the price. Shockingly, the United States has among the lowest life expectancies and highest infant mortality rates of any high income nation yet as Amy Gutmann and Jonathan D. Moreno show we spend twice as much per capita on medical care without insuring everyone. A remarkable, highly readable journey. Judy Woodruff sure to become a classic on bioethics. Everybody Wants to Go to Heaven but Nobody Wants to Die explores the troubling contradictions between expanding medical research and neglecting human rights from testing anthrax vaccines on children to using brain science for marketing campaigns. Providing a clear and compassionate presentation. Library Journal of such complex topics as radical changes in doctor/patient relations, legal controversies over in vitro babies, experiments on humans, unaffordable new drugs, and limited access to hospice care, this urgent and incisive history is required reading for anyone with a heartbeat.

Ethics by Committee Micah D. Hester, 2008. Ethics by Committee was developed for the tens of thousands of people across the United States who serve on hospital and other healthcare ethics committees. HECs. Experts in bioethics, clinical consultation, health law, and social psychology from across the country have contributed chapters on ethics consultation, education, and policy development. The chapters discuss important considerations for HEC members such as promoting just and ethical organizations, developing cultural and spiritual awareness, and preparing for the forces of group dynamics in committee discussions and consensus building. No other book on the market offers the diversity of perspectives and topics while remaining focused, clear, and useful.
