Selling in Customer Service Leon Cai, 2024-08-27 Service in this book refers to the behaviors and actions of serving customers Selling in this book refers to the behaviors and actions of selling products to customers Hence this book is completely different from other books on these subjects Despite the fact that there are many books on service improvement and many related to selling skills worldwide there are few books on how service and selling are integrated and coordinated Primarily it focuses on the interaction and transition between the behavior of service and the behavior of selling by sharing methods and skills of how those two are interrelated This book provides many helpful guidelines and solutions for turning customers satisfaction with service into growth in sales Through many refreshing ideas the author helps you deeply understand the significance of integration of and conversion between service and selling and the harm of disconnection between service and selling Many new ideas and viewpoints which are different from other service books or sales books are discussed such as the contention that over service and over selling should be prevented Instead of Giving highly complex and abstract definitions of service or selling this book redefines service and selling with say YES to customers and Make customers say YES respectively Insisting that customers satisfaction with service will naturally lead to their long term loyalty this book emphasizes that customers satisfaction with service has a shelf

lifetime which will soon fade over time Taking the achievement of customer satisfaction as the final purpose of service the author believes that the end of service is not customer satisfaction but to create new customer needs and achieve increased sales Taking meeting or exceeding customer expectations as the golden rule the author insists that customer expectations need to be reduced first then satisfied and upgraded finally Focusing on the development of customers buying needs like other books do this book focuses oppositely on the research of why customers have no buying needs Discourse Analysis and Applications Ronald L. Bloom, Loraine K. Obler, Susan De Santi, Jonathan S. Ehrlich, 2013-06-17 Application of analytic discourse techniques to clinical practice is relatively recent This book's contributors begin with the notion that systematic examination of discourse provides a rich source of data for describing the complex relationships among language social context and the cognitive processes that underlie discourse comprehension and production Evidence is provided that when discourse is studied across different clinical populations analysis yields an optimal opportunity for developing dynamic models of brain and language that more thoroughly account for the complexity of language use in social contexts Accordingly studies presented in this volume have a dual focus to examine the implications of discourse research on neurolinguistic theories and to evaluate the contribution of discourse analysis to understanding the clinical status of patients with brain damage As such this volume reports patterns of preserved and impaired discourse behavior in normal adults and in different adult clinical populations It also describes numerous tasks designed to elicit a variety of discourse genres and a host of techniques created to describe how subjects order information and relate ideas across sentences In addition it includes numerous abstract units and linguistic devices targeted to examine those aspects of discourse that govern cohesion organization and topic manipulation This volume is unique because it presents both theoretical and clinical papers that examine a variety of communication pathologies Clinicians often report dissatisfaction with formal test batteries in that results are often at variance with clinical observation of performance in real life situations To address this concern this work proposes methods for examining discourse that move the examiner closer to naturalistic sampling The research presented demonstrates that discourse analysis provides clinically significant information that contributes to the understanding of the cognitive linguistic and social status of people with communication disorders These studies also offer a framework to support continuously evolving diagnostic and treatment paradigms for adults with neurological communication pathologies
