Ethics: An Overview Robin Attfield, 2012-03-08

This is the definitive companion to the study of ethics. It provides students with an accessible comprehensive and philosophically rigorous introduction to the major thinkers, issues and debates. Ideal for use on undergraduate courses but also of lasting value for postgraduate students, the structure and content of this textbook closely reflect the way ethics is studied. Thematically structured, the text provides a historical overview of the subject and a comprehensive introduction to the main branches of ethics: meta ethics, normative ethics and applied ethics. The book also includes coverage of key aspects of value theory and key issues concerning agency and moral responsibility. It applies ethics to contemporary issues such as climate change, the environment, development, poverty and war. Crucially, the book encourages students to do ethics for themselves, equipping the reader with a wide-ranging grasp of the discipline in all its central areas of contemporary study and reflection. Robin Attfield's cogent and thorough analysis is supplemented by student-friendly features including chapter summaries, study questions, exercises and a comprehensive guide to further reading and other resources.

Introduction to Animal Rights Gary Francione, 2010-07-29. Argues that the way humans treat animals results from the contradiction between the ideas that animals have some rights but that they are also property and offers ways to resolve the conflict.

Research Handbook on Human Rights Law and Health Elizabeth Wicks, Nataly Papadopoulou, 2025-09-10. This Research Handbook examines the many ways in which health engages human rights law. It also explores current debates which challenge traditional perspectives of rights and identifies potential new directions in which human rights law might venture. Elizabeth Wicks and Nataly Papadopoulou bring together renowned experts who pose important questions about the limits of human rights and the law more broadly as new threats and opportunities related to health emerge.

Ethics in Practice Hugh LaFollette, 2014-01-02. The fourth edition of *Ethics in Practice* offers an impressive collection of 70 new, revised and classic essays covering 13 key ethical issues. Essays integrate ethical theory and the discussion of practical moral problems into a text that is ideal for introductory and applied ethics courses. A fully updated and revised edition of this authoritative anthology of classic and contemporary essays covering a wide range of ethical and moral issues. Integrates ethical theory with discussions of practical moral problems and includes three essays on theory written specifically for this volume. Nearly half of the essays are written or revised exclusively for this anthology which now also features eleven essays new to this edition as well as expanded sections discussing theory, reproductive technologies, war and terrorism and animals. Content allows teachers to discuss discrete practical issues e.g. euthanasia, focus on the broader grouping of topics e.g. life and death or focus on common themes which bridge sections: sexism, moral standing, individualism and community. Section introductions not only outline the basic issues discussed in the essays but relate them to theoretical perspectives and practical issues discussed elsewhere in the book. Guides students with supporting introductory essays on reading philosophy, theorizing about

Animal Suffering, Human Rights, and the Virtue of Justice Per Bauhn, 2023-03-29 In this book Per Bauhn does three things First he outlines some aspects of contemporary philosophical views on animals and morality including the criticism of speciesism and the animal rights argument Second he criticizes these views arguing that we cannot escape a speciesist perspective on morality and that there are no good reasons why we should believe that non human animals have moral rights Third he argues that cruelty against non human animals is morally wrong but not because animal rights are being violated but because human agents who inflict cruelty on non human animals are failing their duty to develop in themselves the virtue of justice This latter argument is reminiscent of Immanuel Kant's idea that we have only indirect duties

towards animals but unlike that idea Bauhn's argument does not depend on any causal hypothesis that humans who are cruel to animals are likely to be cruel also to their fellow humans. Instead Bauhn's argument relies on the fact that being cruel to non-human animals and other innocent beings is conceptually and logically inconsistent with the virtue of justice, a virtue which agents are rationally required to develop in themselves.

Beyond Prejudice Evelyn B. Pluhar, 1995. In *Beyond Prejudice* Evelyn B. Pluhar defends the view that any sentient creature being one capable of caring about what happens to him or herself is morally significant, a view that supports the moral status and rights of many nonhuman animals. Confronting traditional and contemporary philosophical arguments, she offers in clear and accessible fashion a thorough examination of theories of moral significance while decisively demonstrating the flaws in the arguments of those who would avoid attributing moral rights to nonhumans. Exposing the traditional view which restricts the moral realm to autonomous, fully fledged persons as having horrific implications for the treatment of many humans, Pluhar goes on to argue positively that sentient individuals of any species are no less morally significant than the most autonomous human. Her position provides the ultimate justification that is missing from previous defenses of the moral status of nonhuman animals. In the process of advancing her position, Pluhar discusses the implications of determining moral significance for children and abnormal humans as well as its relevance to population policies, the raising of animals for food or product testing, decisions on hunting and euthanasia, and the treatment of companion animals. In addition, the author scrutinizes recent assertions by environmental ethicists that all living things or that natural objects and ecosystems be considered highly morally significant. This powerful book of moral theory challenges all defenders of the moral status quo which decrees that animals decidedly do not count to reevaluate their convictions.
