Nibelung's Ring, The Peter Bassett, 2003 This accessible text guides novice and seasoned opera listeners alike through Richard Wagner's renowned Ring cycle To aid in understanding this complex and often contradictory work a modern day prose translation of its four component operas is provided as is an explanation of The Nibelung's Ring's mythological background Wagner's creative process and the ideas conveyed throughout each component A section reviewing its numerous musical themes and how they bind the cycle together musically is also included Rarely seen lithographs by artist Hugo Braune illustrate the story

Tree-ring Dating and Archaeology M.G.L. Baillie, 2014-10-24 The analysis of tree ring patterns or dendrochronology is a very exact science and an important dating technique The basis of the method is misleadingly simple that overlap of successive older ring patterns can generate a master chronology and samples of unknown age can then be checked against this This book published originally in 1982 traces the development of a specific project from its inception to the successful completion of some of the longest chronologies in Europe In doing so it looks at some of the problems associated with the subject and at the levels of precision possible After outlining the techniques associated with the measurement and processing of tree ring patterns the author traces an attempt to construct such an independent chronology in a new area The book breaks naturally into sections conditioned by the availability of timbers and these can be listed as modern late medieval medieval early medieval and prehistoric As far as possible the results are presented in the order in which things happened thus preserving the sense of a developing subject

Five Ring Circus Christopher A. Shaw, 2008-07-01 The shiny rings of the Olympic Games have grown tarnished over the years as doping corruption and other scandals rise to the surface Those scandals are the tip of the iceberg according to author Christopher Shaw the lead spokesperson for several anti Games groups Five Ring Circus details the history of how Vancouver won the bid for the 2010 Games who was involved and what the real motives were It describes the role of corporate media in promoting the Games the machinations of government and business and the opposition that emerged Disturbing questions come to light Why does the IOC pay no taxes Who are the real estate developers behind the Vancouver bid Why are mega projects paid for with tax dollars What are the true costs of the Games The Olympic Games once considered the pinnacle of athleticism and fair play have become a cesspool of greed backroom deals and the wholesale trampling of civil liberties In Vancouver preparations for the 2010 Games have had a substantial negative impact on the environment and has resulted in the economic cleansing of the poor and homeless This book is a cautionary tale for future Olympic bid cities and will appeal to those concerned about the effects of globalization on many aspects of life

a common interest in the transition between the Neolithic and the Early Bronze Age in the lands around the Aegean Neolithic community was transformed in some places incrementally and in others rapidly during the 5th and 4th millennia BC into one that we would commonly associate with the Bronze Age Many different names have been assigned to this period Final Neolithic Chalcolithic Eneolithic Late Neolithic I II Copper Age which to some extent reflects the diversity of archaeological evidence from varied geographical regions During this long heterogeneous period developments occurred that led to significant changes in material culture the use of space the adoption of metallurgical practices establishment of far reaching interaction and exchange networks and increased social complexity The 5th to 4th millennium BC transition is one of inclusions entanglements connectivity and exchange of ideas raw materials finished products and quite possibly worldviews and belief systems Most of the papers presented here are multifaceted and complex in that they do not deal with only one topic or narrowly focus on a single line of reasoning or dataset Arranged geographically they explore a series of key themes Chronology cultural affinities and synchronization in material culture changing social structure and economy inter and intra site space use and settlement patterns caves and include both site reports and regional studies This volume presents a tour de force examination of many multifaceted aspects of the social cultural technological economic and ideological transformations that mark the transition from Neolithic to Early Bronze Age societies in the lands around the Aegean during the 5th and 4th millennium BC

A Neolithic and Bronze Age Landscape in Northamptonshire Jan Harding, Frances Healy, 2013-01-15 The Raunds Area Project investigated more than 20 Neolithic and Bronze Age monuments in the Nene Valley From c 5000 BC to the early 1st millennium cal BC a succession of ritual mounds and burial mounds were built as settlement along the valley sides increased and woodland was cleared Starting as a regular stopping place for flint knapping and domestic tasks first the Long Mound and then Long Barrow the north part of the Turf Mound and the Avenue were built in the 5th millennium BC With the addition of the Long Enclosure the Causewayed Ring Ditch and the Southern Enclosure there was a chain of five or six diverse monuments stretched along the river bank by c 3000 cal BC Later a timber platform the Riverside Structure was built and the focus of ceremonial activity shifted to the Cotton Henge two concentric ditches on the occupied valley side From c 2200 cal BC monument building accelerated and included the Segmented Ditch Circle and at least 20 round barrows almost all containing burials at first inhumations then cremations down to c 1000 cal BC by which time two overlapping systems of paddocks and droveways had been laid out Finally the terrace began to be settled when these had gone out of use in the early 1st millennium cal BC

The Iron Age in Northern Britain Dennis W. Harding, 2004-08-26 The Iron Age in Northern Britain examines the impact of the Roman expansion northwards and the native response to the Roman occupation on both sides of the frontiers It traces the emergence of historically recorded communities in the post Roman period and looks at the clash of cultures between Celts and Romans Picts and Scots Northern Britain has too often been seen as peripheral to a core located in south eastern England Unlike the Iron Age in southern

Britain the story of which can be conveniently terminated with the Roman conquest the Iron Age in northern Britain has no such horizon to mark its end The Roman presence in southern and eastern Scotland was militarily intermittent and left untouched large tracts of Atlantic Scotland for which there is a rich legacy of Iron Age settlement continuing from the mid first millennium BC to the period of Norse settlement in the late first millennium AD Here D W Harding shows that northern Britain was not peripheral in the Iron Age it simply belonged to an Atlantic European mainstream different from southern England and its immediate continental neighbours
