single East Asian Growth model can be said to exist Assessing the various theories put forward to explain the phenomenon and supported by the most comprehensive data the book finds that methods of institutional enhancement were at the core of the growth This institutional enhancement affected state structure and functions economic policy corporate arrangements social structure and relations individual behaviour and domestic and international interaction Each of these elements was a critical aspect of the growth system that defined and propelled the rapid growth *Social Inequality in Post-Growth Japan* David Chiavacci, Carola Hommerich, 2016-09-13 In recent decades Japan has changed from a strongly growing economically successful nation regarded as prime example of social equality and inclusion to a nation with a stagnating economy a shrinking population and a very high proportion of elderly people Within this new forms of inequality are emerging and deepening and a new model of Japan as gap society kakusa shakai has become common sense These new forms of inequality are complex are caused in different ways by a variety of factors and require deep seated reforms in order to remedy them This book provides a comprehensive overview of inequality in contemporary Japan It examines inequality in labour and employment in welfare and family in education and social mobility in the urban rural divide and concerning immigration ethnic minorities and gender The book also considers the widespread anxiety effect of the fear of inequality and discusses how far these developments in Japan represent a new form of social problem for the wider world *The Dollar Crisis* Richard Duncan, 2011-10-31 In this updated second edition of the highly acclaimed international best seller *The Dollar Crisis Causes Consequences Cures* Richard Duncan describes the flaws in the international monetary system that have destabilized the global economy and that may soon culminate in a deflation induced worldwide economic slump *The Dollar Crisis* is divided into five parts Part One describes how the US trade deficits which now exceed US 1 million a minute have destabilized the global economy by creating a worldwide credit bubble Part Two explains why these giant deficits cannot persist and why a US recession and a collapse in the value of the Dollar are unavoidable Part Three analyzes the extraordinarily harmful impact that the US recession and the collapse of the Dollar will have on the rest of the world Part Four offers original recommendations that if implemented would help mitigate the damage of the coming worldwide downturn and put in place the foundations for balanced and sustainable economic growth in the decades ahead Part Five which has been newly added to the second edition describes the extraordinary evolution of this crisis since the first edition was completed in September 2002 It also considers how the Dollar Crisis is likely to unfold over the years immediately ahead the likely policy response to the crisis and why that response cannot succeed The Dollar Standard is inherently flawed and increasingly unstable Its collapse will be the most important economic event of the 21st Century *The Great Trade Collapse: Causes, Consequences and Prospects* Richard E. social classes within it Marx 1863 Smith Ricardo and Malthus were writing at a time when capitalist development was expanding fast and growth was a central in the process The gradual impact of the West on the rest of world became part of a wider process of change in the World Economy European capital increased its domination of the world trade through expansionist commercial policies Wallerstein 1979 The economic growth encouraged commerce The necessity to export and other technological changes formed part of the reason for the decline of feudalism This transition from feudalism to capitalism began in the West and soon made an impact on the rest of the World T Farhang Morady Hakan Kapucu mer Yal nkaya Development GDP treats resources as income without excluding depletion or depression of the resources Moreover GDP has been criticised for disregarding income distribution Despite all the criticism GDP has been the most significant indicator of growth and development With the Post War II reconstruction of devastated countries and in order to kick start the World Economy the state in both developed and developing counties became the important agency to facilitate economic growth The establishment of the Bretton Woods institutions the Keynesian model of government intervention and the US implementation of New Deal facilitated growth This was deliberate strategy to reconstruct and create networks of international cooperation This was pointed out by President Truman in 1949 A program of development based on the concepts of democratic fair dealing All countries including our own will greatly benefit from a constructive program for the better use of the World s human and natural resources Truman 1949 This meant the reinforcement and need to distribute the Benefits of capitalist form of development more widely against the planned economy sustained by the Soviet Union The economist such as Joseph Schumpeter pointed to the possibility that capitalist growth if it is sustained could abolish poverty Schumpeter 1954 pp66 68 Whilst development meant rapid industrialisation GDP became a key policy objective for the policy makers and governments around the world not just in the Soviet Union but the Western Capitalist World to set targets for their Growth Rate The end of the Cold War in the 1980s for some meant triumph of Neoliberal Capitalism The others talked of trade liberalization free movement of capital and the development of information technology facilitating the relocation of businesses across the world Ohmae 1995 Friedman suggested that globalization is the Inevitable Integration of markets nation states and technologies enabling individuals corporations and nation states to reach around the world farther faster deeper and cheaper than ever before Friedman 1999 Development China India and Brazil helped the world economy to grow at least for now However the unevenness of the world economy continues to cause difficulties especially the US as they feeling the threat of their competitors such as China Germany and even India The victory of Donald Trump as the S President has represented an ideological shift from free trade advocator of global capitalism to a mixture of right wing populism Before and after the presidential election he called for the revival of the American economy which has been under considerable pressure since 2008 World Recession In order to prove growth rate Trump has a huge challenge ahead not least to deal with the competition from South East Asian economies especially China It remains to be seen whether the new US administration

will continue with their populist rhetoric In this book Economic Impacts of Globalization Growth Development several academicians provide different analysis of economic growth and economic development The scientific ethics and responsibility of the works in the book belong to the authors writers The book comprises of 15 chapters focusing on economic growth and economic development in the era of globalisation By taking different angles they demonstrate different problems and solutions
