Risk Behavior And Risk Management In Business Life:

Risk Behaviour and Risk Management in Business Life Bo Green, 2013-03-09 Risk behaviour and risk management in business life influence a wide range of fields in which only a very limited amount of research has been undertaken. These topics have often been treated as if they were theoretically and practically isolated from other fields, the so-called risk archipelago problem. What is actually needed is another focus in which the problem of risk is treated as a central theme. The demand for interdisciplinary research means that there is a need for crossing scientific boundaries. In approaching risk problems from a holistic perspective, there is also a parallel need for linking the scientific and the business worlds. Researchers must work closely together in concrete multidisciplinary research projects and in co-operation with the industrial world in seeking out and solving research problems of importance. This book contains selected and re-written papers and key note speeches presented in a risk seminar that Stockholm University organised in June 1997. The seminar in which 200 researchers and practitioners from 26 countries participated was divided into four main topic areas: Risk Assessment and Credit Management, Psychology in Business Life, Risk Management in Small Firms, and Law and Business. In writing this book, the editor invited eight professors from four continents to assist him in introducing the reader to the different and scientific disciplines and in explaining the need for interdisciplinary, multidisciplinary, and cross-disciplinary risk research projects. The book consists of eight chapters, and the target groups are researchers, doctoral and master students at universities, and business people working in the risk management area.

The Oxford Handbook of Banking, Second Edition Allen N. Berger, Philip Molyneux, John O. S. Wilson, 2014-11-27 The Oxford Handbook of Banking, Second Edition provides an overview and analysis of developments and research in banking, written by leading researchers in the field. This handbook will appeal to graduate students of economics, banking, and finance, academics, practitioners, regulators, and policy makers. Consequently, the book strikes a balance between abstract theory, empirical analysis, and practitioner and policy-related material. The Handbook is split into five parts. Part I, The Theory of Banking, examines the role of banks in the wider financial system, why banks exist, how they function, and their corporate governance and risk management practices. Part II deals with Bank Operations and Performance. A range of issues are covered, including bank performance, financial innovation, and technological change. Aspects relating to small business, consumer, and mortgage lending are analysed together with securitization, shadow banking, and payment systems. Part III, entitled Regulatory and Policy Perspectives, discusses central banking, monetary policy, transmission, market discipline, and prudential regulation and supervision. Part IV of the book covers various Macroeconomic Perspectives in Banking. This part includes a discussion of systemic risk and banking and sovereign crises, the role of the state in finance and development, as well as how banks influence real economic activity. The final Part V examines International Differences in Banking Structures and Environments. This part of the Handbook examines banking systems in the United States, European Union, Japan, Africa, Transition countries, and the developing nations of Asia and Latin

Why It's OK Not to Think for Yourself Jonathan Matheson, 2023-09-29 We tend to applaud those who think for themselves the ever curious student for example or the grownup who does their own research Even as we're applauding however we ourselves often don't think for ourselves This book argues that's completely OK In fact it's often best just to take other folks' word for it allowing them to do the hard work of gathering and evaluating the relevant evidence In making this argument philosopher Jonathan Matheson shows how expert testimony and the wisdom of crowds are tested and provides convincing ideas that make it rational to believe something simply because other people believe it Matheson then takes on philosophy's best arguments against his thesis including the idea that non self thinkers are free riding on the work of others Socrates claim that the unexamined life isn't worth living and that outsourcing your intellectual labor makes you vulnerable to errors and manipulation Matheson shows how these claims and others ultimately fail and that when it comes to thinking we often need not be sheepish about being sheep Key Features Discusses the idea of not thinking for yourself in the context of contemporary issues like climate change and vaccinations Engages in numerous contemporary debates in social epistemology Examines what can be valuable about thinking for yourself and argues that these are insufficient to require you to do so Outlines the key practical takeaways from the argument in an epilogue
