Reading between Designs Piers D. Britton, Simon J. Barker, 2010-01-01 From the alien worlds of Star Trek to the realistic operating room of ER the design of sets and costumes contributes not only to the look and mood of television shows but even more importantly to the creation of memorable characters Yet until now this crucial aspect of television creativity has received little critical attention despite the ongoing interest in production design within the closely allied discipline of film studies In this book Piers Britton and Simon Barker offer a first analytical study of scenic and costume design for television drama series They focus on three enduringly popular series of the 1960s The Avengers The Prisoner and Doctor Who and discuss such topics as the sartorial image of Steed in The Avengers the juxtaposition of picturesque and fascistic architecture in The Prisoner and the evolution of the high tech interior of Doctor Who's TARDIS Interviews with the series original designers and reproductions of their original drawings complement the authors analysis which sheds new light on a variety of issues from the discourse of fashion to that of the heritage industry notions of Pop and retro and the cultural preoccupation with realism and virtual reality

Critical Approaches to TV and Film Set Design Geraint D'Arcy, 2018-09-25 The analysis of scenic design in film and television is often neglected with visual design elements relegated to part of the mise en scene in cinema or simply as wallpaper in television Critical Approaches to TV and Film Set Design positions itself from the audience perspective to explore how we watch TV and film and how set design enhances and influences the viewing experience By using semiotics history and narratology and adding concepts drawn from art architecture and theatre Geraint D'Arcy reworks the key concepts of set design Looking at the impact of production design on how the viewer reads film and television these updated theories can be applied more flexibly and extensively in academic criticism D'Arcy creates a new theoretical approach representing a significant expansion of the field and filling the remaining gaps This book is ideal for anyone interested in understanding how we can read and interpret design in film and television and should be the primary point of reference for those studying TV and film set design

Change Mummified Philip Rosen, 2001 Exploring the modern category of history in relation to film theory film textuality and film history *Change Mummified* makes a persuasive argument for the centrality of historicity to film as well as the special importance of film in historical culture What do we make of the concern for recovering the past that is consistently manifested in so many influential modes of cinema from Hollywood to documentary and postcolonial film How is film related to the many modern practices that define themselves as configuring pastness in the present such as architectural preservation theme parks and above all professional historical research What is the relation of history in film to other media such as television and digital imaging How does emphasizing the connection between film and modern historicity affect the theorization and historicization of film and modern media culture Pursuing the full implications of film as cultural production Philip Rosen reconceptualizes modern historicity as a combination of characteristic epistemological structures on the one hand and the social imperative to regulate or manage time on the other Emphasizing a fundamental constellation of pursuit of the real indexical signification and the need to control time he interrogates a spectrum of film theory and film texts His argument refocuses the category of temporality for film and cultural theory while

rethinking the importance of historicity An original and sustained meditation on the historiographic status of cinematic signs Change Mummified is both an intervention in film and media studies and an argument for the continuing necessity of modern historical thinking in its contradictions *Design for Doctor Who* Piers D. Britton, 2021-05-20 The long running popular TV series Doctor Who is Piers Britton argues a uniquely design intensive text its time and space travel premise requires that designers be tirelessly imaginative in devising new worlds and entities and recreating past civilizations While Doctor Who s attempts at worldbuilding are notorious for being hit and miss old jokes about wobbly walls and sink plungers die hard the distinctiveness of the series design imagery is beyond question And over the course of six decades Doctor Who has produced designs which are not only iconic but in being repeatedly revisited and updated have proven to be an ever more important element in the series identity and mythos In the first in depth study of Doctor Who s costumes sets and graphics Piers Britton offers an historical overview of both the original and the revived series explores theoretical frameworks for evaluating Doctor Who design and provides detailed analysis of key images Case studies include the visual morphology of Doctor Who s historical adventures the evaluative character of cosplay and the ongoing significance for the Doctor Who brand of such high profile designs as the Daleks and the TARDIS interior the time tunnel title sequence and the costumes of the Fourth and Thirteenth Doctors Production Design Jane Barnwell, 2004 This work explores the role of the production designer through a historical overview that maps out landmark film and television designs Films and television programmes analysed include Trainspotting The English Patient Mansfield Park and Eastenders *Wonderful Design* Lloyd Whitesell, 2018-07-06 Wonderful Design traces how music bestows glamour and offers a fresh look at the stylistic conventions by which glamour is embodied in film musicals
