Lighting and shadows are used within a range of art forms to create aesthetic effects Piotr Sadowski s study of light and shadow in Weimar cinema and contemporaneous visual arts is underpinned by the evolutionary semiotic theories of indexicality and iconicity These theories explain the unique communicative and emotive power of light and shadow when used in contemporary indexical media including the shadow theatre silhouette portraits camera obscura photography and film In particular Sadowski highlights the aesthetic and emotional significance of shadows The cast shadow as an indexical sign maintains a physical connection with its near present referent such as a hidden person stimulating a viewer s imagination and provoking responses including anxiety or curiosity The cinematic shadow plays a stylistic role by enhancing image texture depth of field and tonal contrast of cinematic moments Such enhancements are especially important in monochromatic films and Sadowski interweaves the book with accounts of seminal Weimar cinema moments Sadowski s book is distinctive for combining historical materials and theoretical approaches to develop a deeper understanding of Weimar cinema and other contemporary art forms The Semiotics of Light and Shadows is an ideal resource for both scholars and students working in linguistics semiotics film media and visual arts *Capturing Moments: 52 Inspirational Photography Ideas* Gary Hulland,2023-10-29
